13.	WILLYS MOTORS, INC.	10

1. SCOPE

1.01 This section provides information on instructional and informational publications available from the manufacturers of the motor vehicles currently used by the Bell System and the method of procuring these publications. Such publications include specification and price books, shop repair manuals, parts books, service letters, bulletins, and special publications, such as shop talks, engineering descriptions, etc. Publications of manufacturers of motor vehicles of most gen-

eral interest are listed under Parts 4 to 13, inclusive. Arrangements for securing publications on other makes can also be made if desired.

1.02 This section is reissued to update the lists of available publications, make necessary changes in names and addresses, and to delete the Studebaker Corporation from the section.

1.03 Training aids such as slidefilms, motion pictures, booklets, etc, produced by the automotive manufacturers are not listed in this section. Lists of training aids and arrangements for the loan of such material can be secured from the local or regional representatives of the manufacturers.

1.04 Due to extensive revisions, arrows indicating changes have been omitted.

2. GENERAL

2.01 These publications can be divided into groups according to useful applications. Some are used in purchasing, others in repair, some for service problems, and others for general information.

2.02 The manufacturers distribute publications in order to further the sales of their products and to enable the owner to get the best service from the product after it is purchased.

2.03 The automotive manufacturers are willing to furnish as many copies of each publication as are required. However, the cost to the manufacturers of these publications is appreciable, ranging from a few cents to as much as fifteen dollars per copy. Therefore, requests should be limited to the publications and quantities actually needed. Field forces should be furnished only those publications appropriate for their use and covering the types of vehicles currently being serviced.

SECTION 720-090-012

2.04 Specification and price books are useful in making comparisons when ordering new equipment.

2.05 Engineering bulletins, descriptions, etc, as a rule, are useful in learning operating principles, uses, and applications.

2.06 Shop manuals, service bulletins, shop talks, and parts books are useful for the repair and maintenance of the vehicles. Such publications should be available when questions arise during repair jobs.

2.07 Lubrication charts are useful in determining type, amount of lubricant, and location of fittings.

3. ORDERING AND CANCELING

3.01 The publications may be procured directly from the manufacturer or direct representative of the manufacturer without charge. Requests should be handled by the appropriate Company or Area Supervisor.

3.02 In order to reduce mailing, all publications for an Area or Company should be sent to the headquarter's address for redistribution to

the field. They should be sent to a *Title* in Company or Area Vehicle Administration rather than to a particular person, in order to reduce mailing list revision because of changes in personnel.

3.03 If publications are now being sent to other than a *Title*, or to more than one location in an area, steps should be taken to correct these mailings to conform to 3.02.

3.04 Requests to the manufacturers should be made to the locations listed in this section after each separate publication.

3.05 Certain publications are furnished only on special request. A procedure should be set up to initiate such requests when new or revised publications would be expected.

3.06 Revisions and new issues, except where noted, will be sent without further request in the quantities as requested and entered on the manufacturer's mailing lists.

3.07 Review of publications being received should be made at least annually to determine their continuing need, and requests for cancellation of continuing items should be made where it is found that there is no longer a need.

4. AMERICAN MOTORS SALES CORPORATION

NAME OF PUBLICATION	FREQUENCY OF ISSUE	COMPANY OR AREA M. V. SUPVR. TO MAKE REQUESTS TO
