NOTICE OF DISCLAIMER

This document is issued by Bell Communications Research, Inc. (Bellcore) to inform its clients of Bellcore's Practice on *COMMON LANGUAGE*[®] *Code Set Request Procedures*. Neither this document nor any of its contents should be disclosed to persons other than employees of those companies.

Bellcore reserves the right to revise this document for any reason, including but not limited to, conformity with standards promulgated by various agencies, utilization of advances in the state of the technical arts, or the reflection of changes in the design of any equipment, techniques, or procedures described or referred to herein.

BELLCORE MAKES NO REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, WITH RESPECT TO THE SUFFICIENCY, ACCURACY, OR UTILITY OF ANY INFORMATION OR OPINION CONTAINED HEREIN. BELLCORE EXPRESSLY ADVISES THAT ANY USE OF OR RELIANCE UPON SAID INFORMATION OR OPINION IS AT THE RISK OF THE USER, AND THAT BELLCORE SHALL NOT BE LIABLE FOR ANY DAMAGE OR INJURY INCURRED BY ANY PERSON ARISING OUT OF THE SUFFICIENCY, ACCURACY, OR UTILITY OF ANY INFORMATION OR OPINION CONTAINED HEREIN.

This document does not represent any commitment by Bellcore or by any of its clients to purchase any product using the codes described herein.

Each Bellcore Client Company may have requirements or specifications different from those described herein.

Nothing contained herein shall be construed as conferring by implication, estoppel or otherwise, any license or right under any patent, whether or not the use of any information herein necessarily employs an invention of any existing or later issued patent.

Bellcore does not recommend products, and nothing contained herein is intended as a recommendation of any product to anyone.

1. Purpose

This Bellcore Practice (BR) outlines the procedures to be followed when preparing a request for a new code set or for changes, additions or deletions to existing codes, abbreviations or definitions as specified in COMMON LANGUAGE BRs.

2. Scope

This BR is primarily directed to personnel responsible for reviewing and assessing COMMON LANGUAGE code set usage and needs.

3. Reason for Issue

This BR is a major rewrite of the previous issue.

4. General

Direct questions concerning code set procedures described in this BR through the reader's COMMON LANGUAGE Coordinator who will contact the Language Standards Department, Bellcore.

The Bellcore Language Standards Department provides the technical expertise to maintain the COMMON LANGUAGE code sets. The COMMON LANGUAGE Technical Advisory Groups (TAGs) provide input in accordance with the procedures outlined in the TAG By-Laws. (For a copy of the TAG By-Laws, contact the TAG General Chair.)

5. Language Standards Support Structure

Bellcore's Language Standards Department is responsible for day-to-day maintenance of existing codes, abbreviations, and the documents in which they are published. Problems encountered working with existing codes or abbreviations on day-to-day operations, or questions concerning the use of existing codes and abbreviations should be directed to the appropriate Bellcore COMMON LANGUAGE code set Subject Matter Expert (SME).

The Bellcore Language Standards Department provides the technical resources to research and present changes to the various COMMON LANGUAGE code sets. The proposed changes are reviewed by various user TAGs before incorporation into the standards. The Language Standards Department provides a COMMON LANGUAGE code support structure that contains the following elements:

- **Company COMMON LANGUAGE Coordinator.**

The company COMMON LANGUAGE Coordinator is the single point of contact for communications between Bellcore and Bellcore COMMON LANGUAGE code clients. All requests for new code sets, modifications to existing codes and abbreviations, definitions as specified in COMMON LANGUAGE BRs, and questions regarding COMMON LANGUAGE codes should be directed to Bellcore through the company COMMON LANGUAGE coordinator.

- **Technical Advisory Groups (TAGs).**

TAGs are working groups, composed of Bellcore and Bellcore Client SMEs, responsible for assessing and reviewing new or existing code set needs. TAGs have been established for the following code sets:

- CLCITM-MSG Codes - Code set for the identification of Message Trunk Groups/Circuits.
- CLCI-S/S Codes - Code set for the identification of Special Service Circuits.
- CLFITM Codes - Code set for the identification of Facilities, Ancillary Details and Bank Type Codes.
- General Codes and Abbreviations - A family of code sets that apply to many operations/processes in a company and are not specific to another particular COMMON LANGUAGE code set.
- CLLITM Codes - Code set for the identification of locations.
- NC/NCITM Codes - Code set for the identification of network channel requirements and associated interface specifications.
- CLEITM Codes - Code set for the identification of telecommunications equipment. The TECC (Telecommunications Equipment Catalog and Codes) TAG also includes Equipment Investment (EI); Equipment Bar Codes; Frame Function Codes (FFCs) and Equipment Planning Codes (EPCs).

6. Transmittal of Requests

Requests may be transmitted to Bellcore Language Standards in the following ways:

- On Paper via Facsimile or Mail.

Send Form LS1/LS2 along with all supporting documentation.

- Electronically, e.g., E-Mail.

Send Form LS1/LS2 along with all supporting documentation. If some documentation will be mailed or sent by facsimile, note that on the form.

7. Requests for New Code Sets (Form LS1)

All requests for new code sets must be made using Form LS1, *Request for New COMMON LANGUAGE® Code Set Development*. See Figure 1.

If the development of the new code set is authorized, a data standard will be developed, an Information Letter (IL) will be issued, a COMMON LANGUAGE code set BR will be published and appropriate standards bodies will be notified as necessary.

Form LS1 must contain the date; the number of pages; the suggested name of the code set; the originator's name, company, and telephone number; company ID number and priority.

Descriptive information concerning the need, application, and basic requirements for the code set should be provided and must not be proprietary.

The guidelines to be followed when entering the required information in the *Description* portion of the form are:

- Describe all known requirements for use of the code set (Intra and Intercompany).
- Identify the Systems, Departments, Standards Bodies and User Groups that will be affected by the code set.
- Identify the users and the tasks they will perform with the code set.
- State the estimated ultimate growth of the code set.
- Describe how the information is presently exchanged or communicated.
- Describe any machine or design constraints that will affect the code structure, will limit the code length, or will determine which characters may be used.
- Describe any preference for the design of the code set.
- Attach samples of forms/screens in which the codes will appear.
- Attach a sketch or diagram to clarify the values to be coded .
- Include tariff pages, if applicable.
- Provide any additional information that will help in the development of the code.

NOTE: Additional pages, if necessary, may be attached to Form LS1 to include all available information as previously outlined. Number pages 1 of 3, 2 of 3, etc. The bottom portion of Form LS1 should contain the name and telephone number of the individual(s) to contact for further information.

8. Requests for Code Set Additions, Changes, or Deletions (Form LS2)

All requests for additions, changes or deletions to existing codes, abbreviations and definitions as specified in COMMON LANGUAGE BRs should be sent to the Bellcore Language Standards Department via Form LS2, *COMMON LANGUAGE® Code Set Update Request* (Figure 2).

Requests must contain a description of the requested action and the reason for the action. Proprietary information must not be provided.

Supporting documentation such as engineering documentation, service diagrams, tariffs, etc. must be provided to support the request.

All LS2s must be submitted no later than two weeks prior to the TAG meeting as specified in the TAG By-Laws.

The Code Set SME will review the request to insure that the necessary supporting documentation is provided and will ascertain that the request has not been met in another way.

Code set additions, changes, and deletions generally require TAG approval. Some code sets such as Bank Codes, Manufacturer Codes, IAC Codes, Exchange Carrier Codes, Geopolitical Codes, etc. do not require TAG approval.

9. Expedited Request Procedure (Form LS2)

When it is necessary to expedite a request, the originator must follow the procedures specified in the TAG By-Laws. The following is excerpted from the By-Laws:

- When it is necessary to expedite a request, the TAG member will contact the Bellcore SME and submit an LS2.
- The SME will distribute necessary information to the primary code set coordinators and make arrangements for a conference call to discuss the request.
- The objective of the conference call is to obtain concurrence for tentative approval of the request.
- Conference call notes will be distributed about one week after the call.
- If tentative approval is agreed upon by the members, the requesting company is free to use the agreed solution.
- Final approval can only occur at a TAG meeting.
- If the requesting member determines that the need for the expedited LS2 has changed after conference call action, the member must inform the Bellcore SME and all primary

coordinators of this new information. This must include the originator's new recommendation for further action.

10. Code Set Update Request Resolution (Form LS3)

Notification of the action taken on LS1/LS2 requests will be via a *COMMON LANGUAGE® Code Set Update Request Resolution*, Form LS3 (Figure 3). Copies of LS3s will be distributed as specified in the TAG By-Laws to all Support Level COMMON LANGUAGE Coordinators.

11. Requirements for Specific Code Set Additions, Changes, or Deletions (Form LS2)

All requests must contain the following common information:

- Date
- Number of Pages
- Code Set Name
- BR Practice Number and Issue
- Originator's Name/Telephone Number
- Company
- Company ID number
- Priority
- Name and telephone number of person to contact for additional information.
- Supporting documentation

Generally, one LS2 is required for each code request. For specific information, see the code set section of this document or contact the code set SME.

Requirements for specific code sets are listed below.

A. *CLCI-MSG Code Set*

In addition to the common information, the client **must** provide the following:

- Suggested definition.
- Type of code being requested, e.g., Traffic Use Code (TUC), Trunk-Type Modifier.

- How the requested code will be used, e.g., kind of service, type of customer, etc.
- Supporting technical information and diagrams.
- Tariff or FCC order, if applicable.
- If the trunk group will carry all traffic offered to it or if different parcels will be served by different trunk groups.
- Other code sets affected by this request and detailed implications.

The client **may** provide:

- User-preferred code.

Requests for changes to existing definitions specified in the BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

B. CLCI-S/S Code Set

In addition to the common information, the client **must** provide the following:

- Is request for a new service code with modifiers, or a new modifier to be used with an existing service code.
 - If a service code is required for both IntraLATA and LATA Access jurisdictions, two codes need to be assigned and this should be requested on separate LS2 forms.
 - If a new modifier is requested to work with multiple service codes, one LS2 form may be used; however, IntraLATA and LATA Access service codes should be on separate LS2 forms.
- For either element (service code or modifier):
 - User-preferred code.
 - Suggested definition.
 - Supporting technical documentation and diagrams.
 - Tariff or FCC order, if applicable.
 - Other code sets affected by this request and detailed implications.
- For a new service code request:
 - Analog, digital or both.
 - Electrical or optical.
 - Switched or non-switched.
 - IntraLATA or LATA Access.

- Applicable fifth and sixth position modifiers.
- For a new modifier request:
 - Service code the modifier applies to.
 - Specify fifth or sixth position modifier.
 - For a fifth position modifier, indicate jurisdiction.

Requests for changes to existing definitions specified in the BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

C. CLFI Code Set

In addition to the common information, the client **must** provide the following:

Facility Type Code requests for either Facility Systems (BR 795-450-100) or Facility Assemblies (BR 795-450-107) **must** include the following:

- Suggested definition including:
 - Name that is being used for the facility, including the type of signal, e.g., analog electrical, digital electrical, analog optical, or digital optical.
 - Frequency range for analog or combined analog-digital facilities.
 - Bit rate for digital or combined analog-digital facilities.
 - Additional details that are considered important for classification of the facility (single sideband transmission, digital framing constraints, etc.).
- Number and type of channels of the facility.
- Is the signal of this facility standardized by an ITU or ANSI standard, or is the signal vendor proprietary?
- Description of the standardized signal must be provided.
- Detailed documentation which has been obtained from the vendor that describes the physical layout and function of the facility equipment. This includes documentation on repeaters/regenerators used on the line of the facility, as well as the terminating equipment of the facility.
- How the requested code will be used.
- Other code sets affected by this request and detailed implications.

Requests for changes to existing definitions specified in the BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

Facility Detail—Cable Code requests (BR 795-450-201) must contain the following information:

- Suggested definition including:
 - Type of cable that the feature applies to.
 - Explanation of the cable attribute which needs to be identified, e.g., non-dispersion shifted.
 - Documentation describing the new type of cable in terms defined by (1) ITU/ANSI standards, (2) vendor documentation, (3) comparison with previous cable products without the new attribute.
 - Other code sets affected by this request and detailed implications.
- How the requested code will be used.

Requests for changes to existing definitions specified in the BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

Facility Detail—Bank Type Code (BR 795-450-202) requests require the following information:

- Complete name of the Bank unit manufacturer.
- Suggested definition including:
 - Complete unit name, or part number, of the mounting shelf (hardwired unit) which constitutes the Bank.
 - Number of low speed assignments (mountings) available on the bank (shelf).
 - CLEI Code of the hardwired mounting position. (NOTE: Not the CLEI assignment code.)
 - Description of the highest speed physical facility which terminates on the bank, e.g., a T3 multiplexer terminates a T3 facility.
- Manufacturer's catalog information, and a complete description of the multiplex operation of the unit, including all frequencies or digital rates, and a copy of the manufacturer's ordering or engineering applications documentation.
- How the requested code will be used.
- Other code sets affected by this request and detailed implications.

Requests for changes to existing definitions specified in the BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

D. NC/NCI Code Set

In addition to the common information, the client **must** provide the following:

- Is request for NC Code, NCI Code or both. If for both, consider submitting separate LS2s.

For either code:

- Suggested definition including:
 - Analog, digital or both.
 - Electrical or optical.
- Each data element requested:
 - Example of full code, i.e., NC or NCI.
 - Example of combination with the other code, i.e., if NC request, example(s) of NCIs to be used; if NCI request, example(s) of NC code to be used.
- How the requested code will be used.
- Other code sets affected by this request and detailed implications.

For NC Code:

- If new type of channel code, or enhancement to existing channel code.
- Switched or non-switched channel code.
- If the channel terminates in a CO switch, specify switch functionality, e.g., PSTN, PPSN, CENTREX, FR, ATM.
- If switched (PSTN, CENTREX), show Feature Group or Transmission Type.

For NCI Code:

- Physical entities connected at electrical or optical interface.
- Location, i.e., End User POT, CO POT or Access Customer POT.

The client **may** provide:

- User-preferred code.

Requests for changes to any of the existing definitions in BR 795-403-101 must be submitted as marked copies of the BR pages attached to the LS2 request form.

E. CLLI Code Set

Requests for COMMON LANGUAGE Geographical and Geopolitical Codes will be made in accordance with the procedures set forth in BR 751-100-050, *COMMON LANGUAGE® Geographical Code Description*, and BR 795-100-055, *COMMON LANGUAGE® Geopolitical Code Description and Listings*, and the CLLI Methods and Procedures (M&P).

In addition to the common information, the client **must** provide the following:

- See BR 795-100-100, *COMMON LANGUAGE® CLLI™ Code Description for Location Identification*, for existing CLLI Code Set selections.
- All CLLI Code Set LS2 requests for additions, deletions or changes to the definitions or structure of the Network Entity Code, Network Support Site Code, or Customer Site Code must include:
 - Information on how the code will be used, e.g., facility termination or circuit termination, switching, etc.
 - Why the change is needed.
 - Why the code should be eliminated.
 - The appropriate vendor or manufacturer documentation for Tables B, C, D and E, if applicable.
- Each CLLI Code Set request for a Network Entity Code must include the anticipated code power requirement.
 - The maximum code power for entity codes is 10(n), 26(a), 36(x), 100(n)(n), 676(a)(a) and 1296(x)(x).
- LS2 requests for the CLLI Code Set can only be made for the following Code Set elements:
 - **Network Entity Code** (Character Positions 9-11 of the Network Entity Format). Network Entity Codes indicate code classification and category requirement according to the following:
 - Switching (Table B)
 - Switchboard and Desk (Table C)
 - Miscellaneous Switching (Table D)
 - Nonswitching (Table E)
 - **Network Support Site Code** (Character Positions 7-11 of the Network Support Site Format). Network Support Site Codes indicate the preferred code category selection.

See Table F for the available position 7 codes only.

Requests for changes to existing definitions specified in the BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

NOTE: It is not the intent of the CLLI Code Set to identify every item of equipment or thing at a particular location with a separate CLLI Code, although it is left to the discretion of the CLLI Code users to determine what needs to be identified. The CLLI Code should be thought of as uniquely identifying a

telecommunications location. The CLLI Code Set used in conjunction with other Code Sets will identify most user code requirements.

Requests for **Central Office (CO) Switching System** Codes and **Pair Gain Equipment, Private Branch Exchange, Centrex,** and **Special Service Switching System** Codes must contain the following information:

- The name and address of the vendor or manufacturer of the equipment.
- Official identification of the manufacturer. This may be a sales brochure or specification sheet.
- Complete name of the equipment.
- Type of equipment (analog or digital).
- Manufacturer/vendor documentation describing the equipment and its functionalities.
- How the requested code will be used.

The client **may** provide:

- User-preferred code.

F. General Codes and Abbreviations

In addition to the common information, the client **must** provide the following:

Exchange Carrier Code requests require the following information:

- Identification of the company to be coded verified by attached company letterhead **and** Articles of Incorporation **or** other legal document **or** NECA letter confirming Company Code.
- Other names by which the company may be known.
- Identification of affiliate companies or holding companies.
- Headquarters address of the company.
- Name of the company contact and telephone number.
- Code reason stipulation:
 - new carrier
 - consolidation of carriers (name every carrier involved)
 - rename of carrier.

The client **may** provide:

- User-preferred code.

IAC Code requests must contain the following information:

- Identification of the company to be coded verified by attached company letterhead **and** Articles of Incorporation **or** other legal document **or** NECA letter confirming Company Code.
- Identification of other names by which the company may be known.
- Headquarters address of the company.
- Company contact name and telephone number.

The client **may** provide:

- User-preferred code.

Manufacturer/Supplier/Related Service Company Code requests require the following:

- Name, address, and phone number of the company .
- Company letterhead.
- Company contact name and telephone number.

The client **may** provide:

- User-preferred code.

Requests for changes to any of the existing information specified in the General Codes BRs must be submitted as marked copies of the BR pages attached to an LS2 request form.

G. CLEI Code Set and Equipment Investment (EI) Records

Requests of a broad nature relating to CLEI Codes, EI records, Equipment Planning Codes (EPCs), or Frame Function Codes should be addressed on an LS2 form.

- Reclassification of investment data requests must also be submitted on an LS2 form.

In addition to the common information, the client **must** provide the following:

- An explanation of the reason why a change in Equipment Investment classification is being requested.
- An explanation of the reason why a change in CLEI Code is being requested.

The LS2 is not to be used for new code or record build requests.

- Code and record build requests should be submitted on the Universal Classification Request Form (ISD-096).

This is a multi-section form (Figures 4-8) consisting of the following:

Universal Classification

Request (ISD-096)

Basic Form
(ISD-096)

Specific Code Item Request

Used by CLEI Code support licensees to request CLEI Codes or Equipment Investment Codes from the Language Standards Department of Bellcore. The form should be used for codes which cannot be obtained from an equipment vendor.

Universal Classification
Request Supplement
(ISD-096A).

Used when requesting codes for a system with multiple items. Complete ISD-096 for the main system assembly, and complete ISD-096A for each item associated with the system. *Do not complete ISD-096A for items that are not related to the item you entered on ISD-096.*

Universal Classification
Request Supplement
(ISD-096B).

This form has been discontinued.

Universal Classification
Request Supplement
(ISD-096C).

Used when submitting requests for the development of hardwired Equipment Catalog Item (ECI) records. The areas shaded must be completed by the requester before sending the form to Bellcore Language Standards. Appropriate technical information should accompany this form, if it is not provided on ISD-096. This form is intended for single-item requests. A new form should be completed and submitted for each different item in a multiple-item request.

Universal Classification
Request Supplement
(ISD-096D).

Used when submitting requests for the development of frame function codes, and/or TIRKS[®] function codes and to indicate a need for a bank type code. The areas shaded must be completed by the requester before sending the form to Bellcore Language Standards. Appropriate technical information should accompany this form, if it is not provided on ISD-096.
