

DEDICATED PLANT—STRAND-MOUNTED CLOSURE

CONTROL AND ACCESS POINTS—WIRING ARRANGEMENTS

2. DEFINITIONS

2.01 Dedicated Plant means that a cable pair is permanently assigned from the central office to a specific residence or non-key business address.

2.02 Control Points provide a means of distributing cable facilities from main feeder cables to branch feeder cables and between branch feeder cables.

2.03 Access Points provide a means of connecting pairs in distribution cables to spare pairs in main or branch feeder cables. Cables entering access points from the central office or a preceding control point are termed **IN** cables. Cables leaving access points toward subscribers are termed **OUT** cables.
