CALL COMMANDER® TELEPHONE

## Multiline telephones make your communications service more versatile by expanding your answering, calling and intercom capabilities

### PROVIDES FLEXIBLE SERVICE

Whether your business is large or small, Pushbutton Telephone Service puts the entire office at your fingertips. This flexible service can be arranged with a combination of outside lines, intercom service and conference capability tailored to meet your business communication requirements. Result—the correct phone service for each user.

### SAVES TIME AND STEPS

You can perform a number of functions without leaving your desk. You can make calls on several lines, answer calls for other office phones, transfer calls, and hold a call while you make another call for information. Result—immediate handling of calls, no delays, no lost calls.

### INDICATES LINE STATUS QUICKLY

Built-in signal lights provide identification for lines appearing on more than one phone. You can immediately identify incoming calls, a line in use, a call that has been placed on hold, or an available line. Result—flexible office communications. Your customers receive fast, efficient service.

### ALLOWS FOR SERVICE EXPANSION

Pushbutton Telephone Service is designed to meet the changing needs of a growing business. Additional lines and telephones can be installed quickly and easily. Result—economical and readily available communications service when required.

### MULTILINE FEATURE

Each telephone provides fast, direct calling on a number of internal and outside lines. If one line is busy when you want to make a call, just press another line pushbutton and place your call. Lines are then available on a number of phones to answer and place calls.

### LINE STATUS LIGHT

Multiline telephones have built-in signal lights to show at a glance when you are receiving an incoming call (flashing light), when a line is in use (steady light), or when a caller is on hold (winking light).

### HOLD FEATURE

Enables you to hold a number of incoming calls on the same versatile phone. Just press the HOLD pushbutton and you are free to answer or make other calls without disconnecting the caller on hold. Calls may be transferred to the hold feature and advising another person that he is wanted on the phone.

### OPTIONAL FEATURES TAILOR PUSHBUTTON SERVICE TO MEET SPECIFIC BUSINESS REQUIREMENTS

**INTERCOM** . . . manual or dial selective signaling feature enables you to contact other phones in your system. Just press the INTERCOM button and dial the intercom code number of the person you want. Outside lines remain open for incoming telephone calls.

**CAMP-ON BUSY** . . . maintains a constant check on a called station that is busy and automatically connects the call when the line is open.

**ADD-ON CONFERENCE** . . . permits another inside party on the system to join in a conference with you and the outside caller.

**TIE LINE TERMINATION** . . . this feature can connect your service to another location. Manual or automatic signaling is available.

**EXCLUSION CONTROL** . . . provides temporary privacy on the line during confidential phone calls.
