# COIN TELEPHONES & ACCESSORIES

## SINGLE-SLOT COIN TELEPHONES

Single-slot coin telephones can help operating companies effect important reductions in vandalism, theft and fraud.

They are built extra-rugged and secure, so they're not easy to damage or break into. Hardened steel at critical points discourages drilling. Tongue-and-groove joints between the upper and lower housings resist prying.

Single-slot coin telephones offer new flexibility. Rate revisions and conversion from prepay to semi-postpay require only simple changes in strapping. Telephone is supplied with strapping in the prepay position. When the central office is properly equipped, emergency calling can be provided by a strapping change in the telephone. Field conversion from rotary dial to Touch Calling requires only a change of the upper housing and takes only minutes.

The coin slot accepts U.S. nickles, dimes and quarters. (A Canadian version accepts Canadian coinage.)

A six-foot, plug-ended test cord is available. It enables an installer or repairman to check the operation of the coin telephone while the upper housing is removed. The test cord provides the electrical connection required between a plug in the upper housing and a socket in the lower housing.

High security locks are used on both upper and lower housings. The proper key and a T-shaped tool are required to remove either the upper housing or the vault door.

## LOOK AT ALL THESE OUTSTANDING FEATURES

- High-security, all-steel housing and extra-heavy vault door have tongue-and-groove construction to resist prying.
- Critical security areas, such as the rim around the cash vault door, are protected by hardened steel liners which discourage drilling.
- Secure latching mechanism and locks for the upper housing and vault door.
- Protected coin chute prevents stuffing. Opening coin return door blocks access to chute.
- Optional switch assemblies connect to telephone company alarm system.
- Rejector mechanism sorts coins internally. Tests coins for size, weight, perforation (such as in a washer), and elasticity.
- Telephone will operate whether coin battery is applied to one side of the line or both sides.
- Electronic totalizer adds value of coins deposited and stores total.

## HOW TO ORDER AND PRICE SINGLE-SLOT COIN TELEPHONES

Step No.	Description	Ordering No.	Price
<b>1</b> Type of Coin Operation	Prepay (convertible to semi-postpay by strapping) . . .	<b>ND-120</b>	<b>\$268.30</b>

.....	HH-880035-A Directory Hanger Bracket Kit .....	<b>1.15</b>
<b>S-578889</b>	Pin Extractor Tool <sup>7</sup> .....	<b>.88</b>

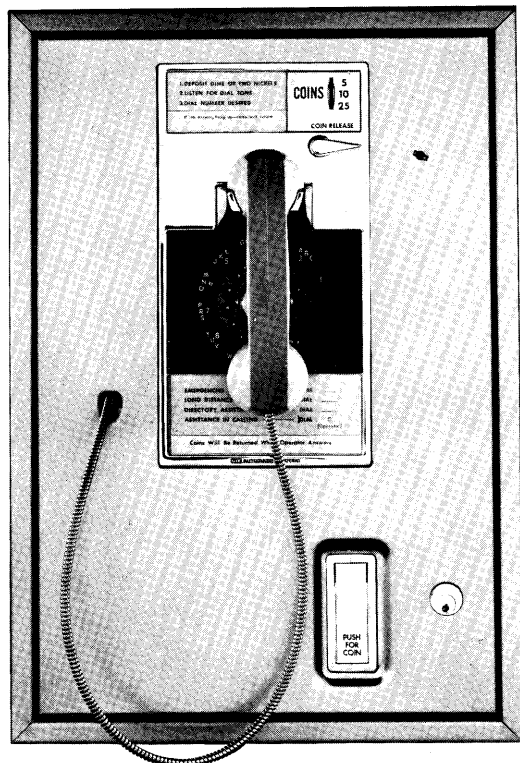

**NOTES:**

- <sup>1</sup>Security stud aids in mounting telephone in booth, or to backboard. Order four studs per telephone.
- <sup>2</sup>Six-foot cord permits testing telephone when upper housing is removed.
- <sup>3</sup>Switch assemblies connect to telephone company alarm system. Activated by unauthorized removal of upper housing or vault door.
- <sup>4</sup>Backboard is used to mount the telephone to a wall. Also needed for security mounting in booths not designed for accommodating WE1A1 coin telephone.
- <sup>5</sup>Simplifies mounting of vault lock.
- <sup>6</sup>For field conversion of rotary dial telephone to Touch Calling operation.
- <sup>7</sup>Used to make strapping changes on printed wiring card.

Prices are subject to change without notice.

# COIN TELEPHONES & ACCESSORIES

## PANEL ENCLOSURES FOR SINGLE-SLOT COIN TELEPHONES

Single-Slot Coin Telephone installed in panel enclosure

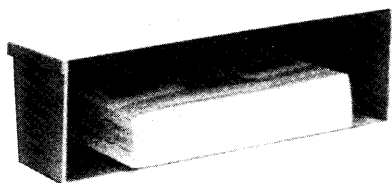

Stainless steel panel enclosure fits over single-slot coin telephone to permit attractive flush or surface mounting in prestige locations.

Anti-vandalism features include tongue-and-groove joints between panel door and frame to prevent prying, plus substantial, continuous door hinge. Heavy sliding bar latches door securely to frame at four points. Sliding bar is actuated by the same T-shaped tool used for upper housing and vault door locks on the single-slot coin telephone. Provisions are made for addition of a lock to secure the sliding bar in the latched position. Lock is the same one used as upper housing lock of the single-slot coin telephone and uses the same key.

### WOOD BACKBOARDS

For mounting coin telephone and ringer box. Shipping weight, 2 $\frac{3}{4}$  pounds. Black only.

- S-550414**.....each **\$6.80**

### HANDSET WEIGHTS

For Type 810 or 811 handset equipped with an armored cord. Prevents spring action of cord from holding handset in off-hook position. Weight fits inside handset.

- S-439314**.....each **\$1.79**

## CONVERSION KITS FOR THREE-SLOT COIN TELEPHONES

### SLUG-PROOF COIN TELEPHONE KITS

Kits provide older coin telephones with anti-slug protection for the quarter channel. (This feature is standard on all current GTE Automatic Electric coin telephones.) When slug is dropped in the 25¢ chute, a magnet pulls the slug away from the gong before it strikes and registers payment. This prevents transmission of a tone signal to the operator. Kits are not suitable for the new Canadian quarter.

Kit includes magnet and necessary 25¢ channel with magnet slot.

- P-70298-1** Slug-Proof Coin Telephone Kit for U.S.....each **\$1.65**

### ANTI-STUFFING COIN RETURN KITS

For installing the anti-stuffing coin return on existing coin telephones. Includes anti-stuffing coin return, modified refund chute, coil spring, hinge pin and a return escutcheon. NOTE: A special drill jig is required to properly locate the hinge pin hole. Available on a rental basis. Check with your sales representative.

- P-70293** Anti-Stuffing Coin Return Kit. Chrome finish.....each **\$4.75**

### LOCAL PREPAY CONVERSION KITS

For converting prepay and semi-postpay three-slot coin telephones to local prepay mode. Includes complete instructions.

- HH-880013-1** Kit for LPC Series three-slot coin telephones, rotary dial and Touch Calling.....each **\$46.00**  
**HH-880014-1** Kit for LPB Series three-slot coin telephones, rotary dial only.....each **59.00**

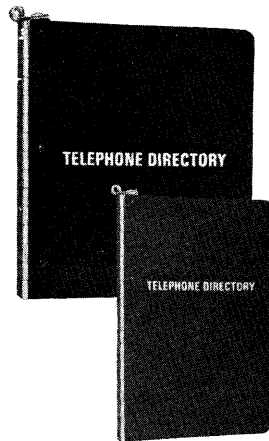

Technical Literature: GTEP 997-250-801 Issue 1

### TOUCH CALLING KITS FOR LPB SERIES COIN TELEPHONES

Kits for field conversion of standard rotary dial coin telephones to Touch Calling. The conversion kits include the Touch Calling unit, stainless steel adapter and mounting hardware.

- P-70307-C** Prepay Kit, 12-button (ABC) Touch Calling Unit, single coil coin relay.....each **\$76.50**  
**P-70311-C** Semi-Postpay Kit, 12-Button (ABC) Touch Calling Unit.....each **53.70**  
**P-73016-C** Local Prepay Kit, 12-Button (ABC) Touch Calling Unit.....each **53.70**

## UNIVERSAL DIRECTORY BINDERS

**INDOOR TYPE.** Flexible heavy duty vinyl cover resists wear, remains attractive. Nylon reinforced center spine provides strength and flexibility. Swivel in top of center spine allows corner suspension.

**OUTDOOR TYPE.** High strength, rigid vinyl cover gives durability and provides an attractive appearance in extreme heat or cold. Swivel in top of center spine allows corner suspension. Aluminum eyelet in middle of metal center spine permits balanced center suspension for larger sizes. A heavy duty center hook and accessory nut are included with binder. Two spring-loaded piano type aluminum hinges assure longer life for directory and cover.

Colors: black or navy blue. Special colors are available with order of 1000 or more.

NOTE: Specify telephone company logo to be imprinted on cover panels.

### PHOTO ELECTRIC CONTROLS

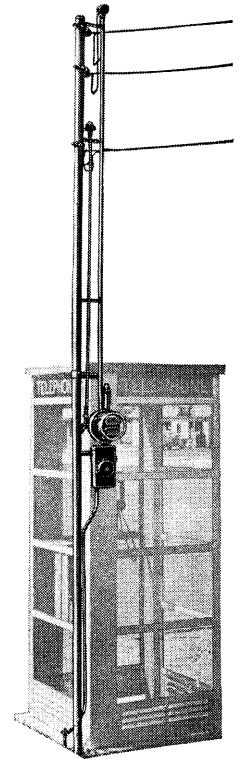

Automatically turns light on at dusk, off at dawn. Built-in time delay prevents false operation by auto headlights and other transient light. Hang unit on outside of booth wall.

Hermetically sealed photocell. 120 volt, a.c., 600 watt capacity. Operating temperature range: minus 40 to plus 75 degrees centigrade.

**S-423626** . . . . . each **\$15.47**

F.O.B. Brooklyn, New York

### SERVICE ENTRANCE MASTS

Mast is portable and can be re-used at new locations. Mast provides complete service entrance facilities for outdoor booths at lower cost and easier installation. Raises power lines for specified ground clearance; looks better, lasts longer; costs less than any comparable installation.

Installation can be completed in less than 30 minutes. Mast is furnished with all insulators, wire holders, entrance devices.

Gray finish. Sizes: 12 and 14 foot masts are stocked; 16 and 18 foot available.

	Price Each
