

## **COMPACT.....CORDLESS SWITCHBOARD**

**an economical way to increase your telephone efficiency!**

# Typewriter size switchboard provides up to five incoming lines and 20 inside telephones!

Modern business techniques include efficient, convenient telephone service. Customer and supplier calls must be handled conveniently and efficiently with a minimum of waiting time. This cordless switchboard offers you the additional service you need for communications efficiency. An amazingly simple keyboard lets your attendant handle calls quickly and easily. The attractive styling and desk-top size gives the switchboard the same modern look as your other business machines...leaves plenty of room on the desk for your attendant to perform additional duties. Yes, this cordless switchboard is a big step toward improving your business communications system.

## CONTEMPORARY STYLING ADDS A TOUCH OF TOMORROW!

A new approach to PBX Switchboard styling! Smooth lines and easy-to-care-for finish make it an attractive addition to any office. Sloping face matches that of the latest business machines. Compact size (about the size of a typewriter) permits the switchboard to fit easily on the corner of a desk.

### FOR EFFICIENT HANDLING OF BOTH INSIDE AND OUTSIDE CALLS!

Small businesses of all types find the cordless switchboard exactly fits their requirements. Incoming calls are handled by the attendant who quickly and easily extends the call to its desired location. Intercom calls are easily handled...your attendant simply pushes buttons to complete the connection. Outgoing calls can be dialed either by the attendant or from the extension.

### CONFERENCES ARE EASY TO ARRANGE...

Your attendant can arrange an inside conference by simply operating extension keys on the same line, and signaling the parties involved.

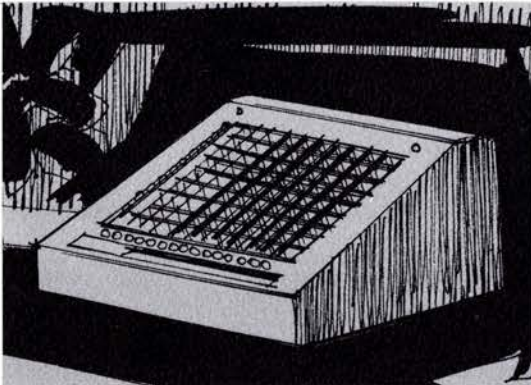

### SIMPLE PUSH KEY OPERATION...

#### ANYONE CAN LEARN TO HANDLE CALLS IN MINUTES!

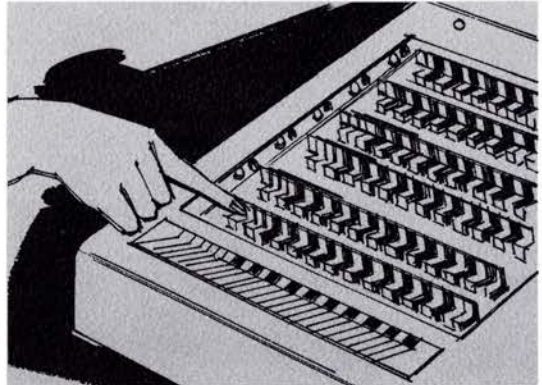

Even a new girl can handle calls efficiently and quickly. Complete instruction manual tells-at-a-glance how to handle every situation, and colored, one-way keys insure accuracy. For example, to answer an incoming call the attendant simply operates the trunk key indicated by a light, lifts the handset, and answers in your prescribed manner.

To connect the call to the desired party, she operates an extension key on the same line as the trunk key and signals the extension.

## THESE STANDARD FEATURES PROVIDE MORE EFFICIENT TELEPHONE SERVICE

**NIGHT SERVICE**—After hours, a number of extensions can be connected for direct inward and outward calling.

**TRUNK HOLDING**—If your operator is busy she can hold incoming calls by operating a separate key for each trunk.

**CONFERENCE CALLS**—An incoming call can easily be connected to several inside lines for a conference.

---

### **ATTENDANT RECALL**

An outside caller may be transferred to another inside party by flashing the operator.

### **AUDIBLE SIGNAL**

Attendant can leave desk or perform other duties within hearing of buzzer signal.
