**Dear Customer:**

We hope you enjoy our new catalog. Unfortunately, we could not include all of our inventory, for it simply varies daily.

Feel free to call us collect with your inquiry. Our staff really is friendly.

Sincerely,  
*Bones*

Warren "Bones" Bohnsack

## SPECIAL EQUIPMENT

BECO

What on earth is it?

## HANDS FREE TELEPHONE AMPLIFIER

Ideally suited for conference calls, the battery operated HANDS FREE TELEPHONE AMPLIFIER is an invaluable time saving device for home and office. Solid state, instant-on, all transistorized pick-up and speaker system amplifies voices of all parties conversing on telephone.

For Nancy, a distinguishing feature of the Model A-1018 is its ability to be used at higher volume levels without "feed-back". The unit supplies 30% more usable amplification than most existing models.

The amplifier assembly requires no installation or wiring. Simply dial or receive phone calls in the normal manner, then place the telephone handset onto the molded amplifier unit. It turns on automatically.

PRICE: \$24.95

**"IT" happens to be a new replacement, plug-in cord assembly circuit for a 555 PBX Board.**

Northern Electric #J59013E-3N

## SUPER VALUE SAVINGS

PRICE: \$45.00 (New)

## MODEL 600 TELEPHONE LINE AMPLIFIER

The Model 600 Telephone Line Amplifier is a completely solid-state of modern design. It is similar to and is a direct replacement for Western Electric Types 100E and F Loudspeakers.

The Model 600 may be used in wayside stations, train dispatchers' offices, in signal towers or any other location where it is desired to amplify the incoming telephone line call. A volume control is provided to preset the level of the amplifier (up to 5 watts) and the operator is relieved of the necessity of wearing a head receiver.

PRICE: \$69.95

## RECEIVER AMPLIFIER HANDSET

Completely reconditioned like new. ITT, W. E. or A. E. Amplifier handsets are available in Black and several colors. Specify second choice.

PRICE: \$27.50

### CENTRAL OFFICE PROTECTORS

Cook Type 3800 C.O. Protectors conserve frame height since pairs are mounted on 3/8" centers. Line connections are on one side of protector, switchboard connections on other side. Unit dischargers are made of two carbons separated by an acetate dielectric and cemented into a unit. They permanently ground under continuous discharge. Self-soldering, wire-wound heat coils of approx. 2.8 ohms resistance opens switchboard circuits, grounds outside lines and sets off an alarm.

PRICE: 3800-21 Pair Units Complete \$42.50

W. E. Reconditioned 1248 and 50 Type:

20 Pair: \$38.50

50 Pair: \$68.50

### COOK TYPE 3800

### STATION PROTECTORS

This new Modular Station Protector is one of the two pair series which permits users to add protection as service demands increase. The type shown is the Model 391, with traditional binding-post style terminations. The standard means of protection is failsafe 1304 carbon.

PRICE: Single line Prot. w/cover	\$2.10
Two line Block Prot. w/o mtd. box	\$3.30
Outside 6 line Block Prot. mtd. box	\$2.50

# RLF ASSOCIATES MODEL RR-60 FAIL-SAFE SOLID-STATE ENCODER

The RR-6C Encoder replaces electromechanical encoders and older, less safe electronic encoders. Since the encoder has all six codes built-in, it can be purchased and installed now as a replacement item for two or three aspect systems and then be used in future expansions. Any common code-following relay such as the WABCO 322 559-005 or the GRS 56001-672-GR1 can be driven (in pairs, if desired).

A single stable master oscillator is used for all output speeds with integrated circuit dividers providing the actual outputs. This basic design in itself would be reliable enough for most uses, but for critical railway signal applications, the circuits are protected so that the output will be 0 for any malfunction or faulty application. The protective circuits are arranged so that each one must operate properly every cycle of the output, or the unit shuts off safely.

For convenience in installation, the encoder's metal case is sized to take one standard relay space in your panels. AAR terminals on the front panel are standard, but variations can be supplied.

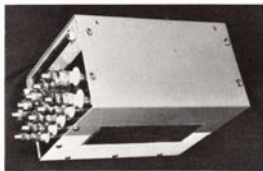

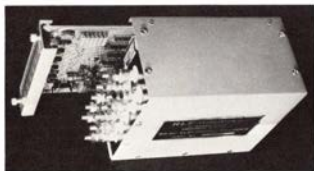

The maintenance man has not been forgotten, either. All components are mounted on a plug-in military grade printed circuit card. Light-emitting diodes (LEDs) mounted on the card behind a window indicate which code is selected and what the output code rate is.

Since all the components are on the card, it can be removed, checked, and adjusted in the shop and plugged into any RR-6C box without further adjustment. No special equipment is needed for any phase of service, and factory service is available, if desired.

**FAIL SAFE IN ALL CONDITIONS**

## PERFORMANCE SPECIFICATIONS

<b>CODE OUTPUTS:</b>	50, 75, 120, 180, 270, and 420 cycles per minute (square wave)
<b>OUTPUT ACCURACY:</b>	+ 2% (adjustable) anywhere in the operating range
<b>POWER SUPPLY:</b>	10-16 VDC — Internal regulation is provided for all critical circuits. Accidental power reversal will not damage unit.
<b>OUTPUT VOLTAGE:</b>	Approximately one-volt below supply voltage level — note that many code following relays do not operate properly at the higher speeds when voltages above 12.5 VDC are applied.

<b>CURRENT REQUIREMENTS:</b>	400 ma, exclusive of relay drive current
<b>OUTPUT CAPACITY:</b>	At least two code following relays — heavier loads, up to 3 Amperes, can be handled with a minor factory modification.
<b>CONSTRUCTION:</b>	Aluminum case, plug-in P.C. card
<b>MOUNTING:</b>	May be mounted in any position. Typical mounting is to a vertical panel.
<b>TEMPERATURE RANGE:</b>	-20° to 75°C (-4° to 167°F)
<b>HUMIDITY:</b>	Will operate with 95% humidity at 75°C

## VISIPHONE

What you see is what you hear, . . . and what you see is really an ear-full. These, almost indecently good-looking phones, of rugged acrylic beauty have everything exposed: terminal box, multi-colored wires, clips, screws, brass bell — the works! And the work they do, because the workings are made under Western Electric license, rigidly tested for quality and performance . . . lift the chrome-and-black handset off the acrylic hook . . . dial the number . . . and see what happens. CLEARLY, UNIQUE GIFTS.

**You've got to believe!**

**SERIES 700  
CHROMEFOE**

Spherical design of mirrored Chrome with striking white accents. Circular white base, surrounded by octagonal clear Acrylic.

9-1/2" High — 6-1/2" diameter base.

**PRICE: \$165.00**

**SERIES 1100  
APOLLO**

Vertical rectangular shape of transparent Acrylic, offset by a flat rectangular base. Chrome and black receiving set.

9" High — 5-1/2" X 6-1/2" base.

**PRICE: \$125.00**

## CHESTPHONE

**DELUXE CHESTPHONE**

This is a real man's telephone. The carved, Polywood chest in Walnut finish is a sight to behold . . . and when the lid is opened, the tan handset and top deck along with tan cord, chrome trim, walnut dial panel and tan inside cover provide a style effect that most discerning people want reflected in their surroundings.

Each Deluxe Chestphone has all working parts installed. It is supplied to you in a "Plug-in and Talk" assembly.

**PRICE: \$125.00**

**LIMITED SUPPLY**

**TRANSMISSION MEASURING SET**

With Oscillator and EE8B Army field phone (LB & CB) built-in. Oscillator, 500 - 1000 - 2500 hertz at 0 - 20 - 40 db levels into 600 ohm load. TMS Range, 100 to 10,000 hertz -50 to +15 dbM in 1/2 db steps from 600 ohm source.

**PRICE: \$75.00**

**ONCE IN A LIFETIME BARGAINS**

TELEPHONE EQUIPMENT AND ACCESSORIES WHICH HAVE NEVER BEEN USED WITH ONLY PACKAGE DAMAGE YET EACH ITEM HAS BEEN INSPECTED, REFURBISHED, TESTED AND REPACKED BY BOHNSACK EQUIPMENT COMPANY AND CARRIES BECO'S FULL "LIKE-NEW" GUARANTEE RATHER THAN THAT OF THE ORIGINAL MANUFACTURER.

**BECO SINGLE SLOT PAY STATIONS**

BECO has many models of Single Slot Pay Stations in stock with either rotary or push button dialing. Most of these pay stations can be wired for prepay or semi-postpay operation.

One series of models have removable outer decorative covers which, if marred or damaged can be easily replaced in the field. These covers also conceal all of the sets security features from prying eyes.

The two models shown are just typical examples of what BECO has available. WRITE OR PHONE FOR ADDITIONAL INFORMATION.

PRICE: All series 100, 200, 400, 2200, 2400

\$150.00

**BECO 10 KEY TELEPHONE SETS**

With BECO 10 key telephone sets, your subscribers can receive, hold, transfer and originate calls on up to nine telephone lines. The lines can be all central office, all private branch exchange, or any combination desired, up to the maximum. Or if the maximum number of lines is not required, the extra keys can be used to control other service features such as add-on, or intercom, provided these services are available from the subscriber's key system.

All BECO 10 key telephone sets are available with either rotary or tone pushbutton dials. Colors: Warm White or Chameleon Grey with contrasting face plates. (State colors.)

PRICE: BECO 200A, Rotary Dial

\$75.00

BECO 2200A, Pushbutton Dial

\$85.00

**BECO HANDS FREE ASSOCIATED UNIT**

This unique hands free unit matches and simply plugs into the BECO 10 key telephone set. It enables the user to work while talking on the telephone. Perfect for conference calls — everyone can join the discussion and hear the person at the other end. Simple controls provide automatic transfer from hands free to telephone handset. There is also a "mute" control if the user wishes to speak to some one locally during a telephone conversation. The private conversation will not be heard on the other end and yet reception continues at the users unit.

PRICE: BECO 1C Handsfree Unit

\$80.00

**BECO 6000 SERIES KEYS**

BECO 6040 and 6041 series keys consist of a six button switch assembly mounted on a metal base and enclosed in a plastic housing. The units may be used for desk top use or can be permanently mounted on either a horizontal or vertical surface by means of screws. The 6040 and 6041 series keys are the same except that the former are equipped with a standard mounting cord.

**PRICE:** BECO 6040 with cord \$39.50  
BECO 6041 without cord \$30.00

BECO 6050 and 6051 series keys consist of respectively, one and two, six-button switch assemblies mounted on a metal base and enclosed in a plastic housing. These units may be attached to a wall, desk or other vertical surface by means of screws. They are designed for both left and right hand side mounting.

These series keys are arranged for BECO A25A and A50A connecting cables respectively. Knock outs at both ends of the housing permit convenient cable entry. These cables can be cut to length required and will be quoted separately.

**PRICE:** BECO 6050 series keys \$30.00  
BECO 6051 series keys \$60.00

**6051**

**BECO 1A1 BELL CHIMES**

The 1A1 Bell Chimes enables subscribers to select a telephone signalling sound and a signalling level to meet changing needs. For example, chimes may be selected when their sophisticated sound is appropriate. Loud bell may be selected when the subscriber expects to be some distance from the unit. The soft bell position is used when the subscriber is near the unit or when it is desirable not to disturb others. Selection is made by a three position switch located on the bottom of the unit.

The 1A1 Bell Chimes utilizes two three inch gongs on 880 and 1100 Hz. It operates from a standard 40-65 volt 20 Hz. ringing supply. A durable plastic ivory cover houses the assembly, and the size is 7 3/16" L X 5" H X 3" D.

**PRICE:** \$17.50

**BUBBLE  
TELEPHONE  
BOOTH**

**MODEL 2000**

BUBBLE TELEPHONE BOOTH MODEL 2000 is manufactured of Methyl Methacrylate, the same material used in the windows of airplanes and outlined with an alloy of aluminum-magnesium silicon. These materials make the Model 2000 completely stable, resistant to impact and traction, and completely suitable for outdoor use.

In closed spaces, as well as outdoors, they may be solidly fixed to walls, columns or metallic supports with maximum facility using only four screws, supports and brackets. And when installed, the Model 2000 is soundproof, providing privacy in conversation and isolation of background noise.

These transparent booths are available in three colors, Red, Green, and Blue. All extremely light in weight, averaging 13 pounds each.
