

**TRIMLINE® TELEPHONE SETS**

The TRIMLINE telephone set has arrived. The tariff is effective May 16. There is a limited supply so do not stimulate sales. These sets should be provided only when a customer specifically requests them.

A Pacific Company practice (Section 002-100-911PT) has been written outlining special procedures to follow in order to maintain control of the limited supply available. There are also five AT&T practices outlining identification, installation, connections, and maintenance. These practices are:

501-162-102
501-259-101
502-320-100
502-321-100
502-321-400

The following will apply to TRIMLINE telephone sets:

Additional monthly charge \$1.25

Installation charge \$5.00

A standard 9-foot mounting cord.

5½-foot and 25-foot mounting cords will not be offered with these sets.

The regular charges apply to the 13 ft. mounting cord, and the 9 ft. handset cord.

The 5½ ft. handset cord is standard.

These sets will come in 9 colors. See Section 002-100-911PT for the colors that will be stocked.

There will be no employee concession rates at this time.

The USOC code is TML. The suffix for color and type of set is needed. ie. TMLEC, TMLWW

There are two types of TRIMLINE telephone bases. A wall type and a desk type. There is one handset which works with either type.

Regular due-dates will be offered when a customer wants a color that is stocked.

There are paste-in pages available for the Service Guide booklet. These pages contain set conversion charts.

Each supervisor responsible for installation and maintenance of the TRIMLINE telephone set should take the time to cover the practices with subordinates before May 16, 1968. The supervisor should also furnish paste-in pages for the Service Guide to each of his subordinates.

The connection charts, Tables A and B in BSP 502-321-400, may be confusing. The conversion shown for tip party identifying ground will work with both 1000 ohm and 2650 ohm central offices.

For training purposes, you can order the following items:

1 Set, Telephone, Hand 220A-*	1 AC1-* Telephone Base
1 Cord, Handset H4DB-*	1 AD1-* Telephone Base
1 Cord, Handset H5AA-*	1 D5AL-* Mounting Cord

*See 002-100-911PT for color selection.

Orders for the above items must be placed through Division Centralized Supply Locations on Form P2830. Upon completion of the training, you must return the Trimline telephone and its components with the duplicate copy of the P2830 to the Division Centralized Supply location.
