## LONG DISTANCE

### Company Lines:

Intercity dialing instructions are given on the dialing chart Pages 2 and 3.

Attention is directed to the various outlying agencies, yard offices, etc., that can be dialed direct. Consult the alphabetical section under station name or the department section under proper heading for stations that can be reached by direct dialing.

All calls except those reached by direct dialing should be placed through PBX operator.

### From Attended PBX's

### Commercial Lines:

Where individual business line telephones have not been provided, toll calls on company business must be placed through PBX operator.

Personal calls, in emergencies and where public pay stations have not been provided, should be placed through operator. When placing long distance calls, the following information must be furnished operator:

- (a) Name of party calling and extension number.
- (b) Name of party called and location. Also designate by extension number if known.
- (c) Wherever practical, toll calls should be requested on a station-to-station basis in order to avoid payment of premium person-to-person rate.

### From Commercial Telephones

Toll calls on company business should be completed wherever practical on a station-to-station basis in order to avoid premium payment of the person-to-person rate.

## SERVICE CALLS

To report commercial telephones out of order call Telephone Company repair service.

To report PBX telephones out of order, dial your operator. Where operators are not on duty, call local SP Wire Chief.

## TO REPORT CHANGES IN DIRECTORY LISTINGS

Directory changes, additions or deletions must be reported immediately to the department employe responsible for preparing Form C.S. 2991 in order that the telephone information records may be kept up to date. Forms may be procured in accordance with instructions issued by General Purchasing Manager—System.

## COMPANY RADIO TELEPHONE

*To initiate call from mobile to an attended PBX:*

1. Switch radio to frequency 2 (F2), or frequency 3 (F3) depending on area in which traveling.
2. Depress push-to-talk button on microphone for approximately 5 seconds, then release.
3. When PBX operator answers, request desired connection.
4. *Reminder:* A radio telephone is a "party" line. The answering party should be informed that you are calling on a radio telephone. Federal Regulations require that radio transmissions include a proper station identification.

*To initiate call from extension telephone:*

1. Dial your PBX operator.
2. Identify the mobile unit you are calling, giving approximate area in which mobile is traveling.
3. *Reminder:* Keep calls brief and to the point, so other users will not be unnecessarily delayed in completing their calls. Federal Regulations prohibit the use of any obscene, indecent or profane language on the radio telephone.

## MOBILE TO PBX RADIO OPERATING INSTRUCTIONS

Three-frequency mobile radios are used on System vehicles to provide communications on the train frequency (F1) and for connection thru various PBX's to any Company telephone (F2 or F3, depending upon territory).

*To operate radio equipped with Monitor Switch:*

The radio set is equipped so that incoming calls can be heard on F1 and F2 or F1 and F3, depending upon the territory in which the vehicle is operating.

To properly monitor Channels 1 and 2:

- (a) Set Frequency (Channel) Switch to Position 2.
- (b) Turn Monitor Switch to "On" position.
- (c) To answer on Channel 2, turn Monitor Switch to "Off" position.
- (d) To answer on Channel 1, place Frequency Switch on F1 and Turn Monitor to "Off" position.

The same sequence is followed for operation on F1 and F3.

*To operate radio equipped with Channel Scan:*

The radio set is equipped so that incoming calls can be heard on any "NP" channels selected.

- (a) Channels to be scanned are selected by depressing any or all of the push buttons designated NP1, NP2, NP3 and NP4 in addition to the "scan" push button. The "scan" push button may be left "in" at all times if desired.
- (b) The push buttons designated F1, F2, F3 and F4 determine what channel you will transmit on.

**MOBILE TO PBX RADIO OPERATING INSTRUCTIONS (Continued)**

(c) The channel that is selected with F1, F2, F3 or F4 will also be the "priority" channel. That is, any received signal on the selected channel will override the other channels being scanned and be received on a priority basis.

Listed below are the PBX stations and approximate coverage:

PBX	Radio Station	Freq.	Approx. Coverage
<b>OREGON DIVISION</b>			
Portland	Blue Lake Lookout	F2	Hillsboro to June
Portland	Mt. Scott	F3	Portland to 10 mi. N. of Salem

## HOW ARE YOUR TELEPHONE HABITS?

The way we use the telephone does a big job of selling or unselling hundreds of thousands of people on Southern Pacific Service.

Our use of the telephone becomes a matter of habit. If our telephone habits are slovenly, the hundreds of thousands of people on the other end of the line get the idea that Southern Pacific Service is not what it should be. If our telephoning habits are good, these same people gain an impression of alertness, efficiency and service.

Our telephoning habits are well worth checking. The ones that are bad should be discarded. The ones that are good should be consciously cultivated. Good habits are just as easy to acquire as bad ones.

When you are talking to a person face to face, you depend on your general expression—a smile or a gesture—to help convey your meaning. But over the telephone, your tone of voice alone conveys the spirit of your message.

Let your tone indicate a pleasant and eager-to-help spirit which will create a good impression of you and the Company, and people will enjoy talking to you and doing business with you.

## HERE'S A CHECK LIST

- Do you open every call: "Freight Station, Mr. Doe speaking"?
- Does your tone indicate a desire to be helpful?
- Do you make every telephone caller feel his problem is important to you?
- Do you speak in a clear, conversational tone, with careful enunciation?
- Do you speak directly into the mouthpiece?
- Do you answer promptly when your phone rings?
- Do you answer other phones and offer to take the message?
- Do you hang up the phone carefully so as not to make a crash in the other party's ear?
- Do you make sure the other party understands your message fully and has no questions to ask before hanging up?

## CLASSIFIED LISTINGS

### BY EXCHANGES

The Classified listings in this Telephone Directory have been organized in a format designed to provide greater utility to our telephone users. These listings appear in the following sequence:

(1) Alphabetically by Telephone Exchanges—All listings on a given Exchange appear in the section for that Exchange. Note that the Exchange and its abbreviation appear at the top of each page and the abbreviation is repeated in the page-edge tab.

(2) Alphabetically by Location—All listings on a given Exchange at a given Location appear in the section for that Location. See pages 13-15 for a list of Locations and their Exchanges. Where a Location is served by more than one Exchange a note to that effect is provided.

(3) Alphabetically by Function—All listings at most large Locations are grouped together under several Function headings. See page 16 for a list of Functions. Listings at smaller Locations are listed alphabetically by the activity listed. Listings for Other Companies are identified by the Company name or abbreviation or appear under the Miscellaneous Function.

The listings appearing in this issue of the Directory have been compiled and stored in such a manner that the total Directory can be continually updated between printings. In order to maintain the quality of our service it is essential that my office be promptly notified when changes, additions, deletions, etc., to these listings occur so that our updating service will be effective.
