

CS2905AG1-58 TELEPHONE SET

IDENTIFICATION AND MAINTENANCE

1. GENERAL

- 1.01** This section contains information on the CS2905AG1-58 (Fig. 1) DESIGN LINE® decorator telephone (Glo Phone).
- 1.02** Whenever this section is reissued, the reasons for reissue will be listed in this paragraph.
- 1.03** Telephone sets having "CS" (CS2905AG1-58) in their apparatus code do not include telephone company-owned components. They are for sale to the customer in their entirety (the housing as well as the transmission and signaling components).

2. IDENTIFICATION

- 2.01** The CS2905AG1-58 (white) is a new DESIGN LINE decorator telephone set (desk only) featuring a membrane dial keypad that becomes illuminated when the handset is off hook. The faceplate is

black when not in use. The set contains an electronic dial-network circuit to provide TOUCH-TONE® dialing. It also contains an electronic tone ringer with on/off control button and is equipped with N1-type handset and modular jacks.

- 2.02** The tone ringer volume is continuously adjustable. The ringer volume control is accessed at the back of the set. An on/off control providing visible indication of status is located on the right side of the set.

- 2.03** Refer to Table A for component parts.

3. MAINTENANCE

- 3.01** No adjustments or wiring changes are to be performed on these sets on the customer's premises.
- 3.02** When it is desired to return a set to Western Electric for repair, it should be packed using an appropriate protective packing material.
