S.W. Bell Tel. Co.

TRANSMISSION ZONING OF CUSTOMER STATION APPARATUS

1. General

1.01 This addendum is issued to authorize the use of 5300-type telephone sets in Zone 2 if they are equipped with a G1 handle containing an F1 transmitter and a U1 receiver. This is the only exception to the tables in the main section authorized for inward station movement.

1.02 The 5300-type telephone set with F1 transmitter and a U1 receiver may be identified by a small "F" cast

into the center of the cap over the transmitter button. There is also a 1/16" thick spacer ring between this cap and the housing handle.

1.03 No additional 5300-type telephone sets with G1 handles containing T1 transmitters and U1 receivers shall be used. Existing 5300 sets in Zone 2 now equipped with T1 transmitter and U1 receiver may remain in service as long as there are no transmission reports caused by their use.
