

TELEPHONE SETS—565LK

CONNECTIONS

1. GENERAL

1.01 This section contains connection information on the 565LK telephone set when used with 1A, 1A1, 1A2, or 6A key telephone systems.

1.02 The 565LK telephone set replaces the 565LB and 565LD sets which are rated Manufacture Discontinued (MD).

1.03 These sets are available in black (-3), green (-51), yellow (-56), white (-58), rose pink (-59), light beige (-60), light gray (-61), aqua blue (-62), and turquoise (-64).

1.04 A 3-type speakerphone system can be used with the 565LK telephone set. If speakerphone control unit is located near the telephone set, the mounting cord conductors can be extended to the control unit by using a 148A or 149A adapter. If control unit is located at the key equipment, extend leads through an A25B connector cable.

1.05 Cord tip insulators on the 148A adapter must be removed to terminate conductors.

Do not pull insulators off with long-nose pliers. Cut insulators off with electrician scissors or diagonal pliers to prevent breaking conductors or stripping off cord tips.

2.01 A P-25E962 auxiliary terminal strip is available for auxiliary services such as buzzers, lamps, etc. It must be ordered separately. See appropriate section for installation of terminal strip.

2.02 A D-179935 kit of parts can be installed in the 565LK set when the exclusion feature is required. It must be ordered separately. For installation information, see appropriate installation section.

2.03 The hold key position can be illuminated, but lamp is not furnished with set.

2.04 The 565LK telephone set is factory wired for use with 1A1 or 1A2 key telephone systems. For 1A key telephone systems, make internal wiring changes as shown in Table A and Fig. 2.

2.05 The red and black ringer leads are factory wired to terminals RR and RT. The ringer can be connected with several options.

TABLE H
PROCEDURE FOR DISCONNECTING SPEAKERPHONE FEATURES
(NOTE 7, FIG. 1)

Lead Desig	Cord Color	Remove From	
	Speakerphone	Network	Terminal Strip
T1	V-G	RR	
R1	G-V		9
P3	V-BR		8
P4	BR-V		7
AG	V-S		N
LK	S-V	L1	

NOTE 1: CONNECT RINGER WITHOUT CAPACITOR AS COMMON, PRIVATE OR INTERCOMMUNICATING LINE SIGNAL EXCEPT WHERE LOCAL INSTRUCTIONS DIRECT OTHERWISE. RINGERS MUST BE WIRED WITH CAPACITOR IN CIRCUIT WHEN COMMON AUDIBLE SIGNAL POWER FAILURE FEATURE IS PROVIDED.

NOTE 2: RINGER LEADS ARE FACTORY WIRED; RED TO RR TERMINAL, BLACK TO RT TERMINAL.

NOTE 3: WHEN OTHER THAN LINE ONE IS EXCLUDED, REMOVE (O-W) MOUNTING CORD CONDUCTOR FROM TERMINAL 1B; INSULATE AND STORE. CONNECT BALANCE LEAD CORD CONDUCTOR OF LINE INVOLVED TO TERMINAL 1B.

NOTE 4: THE HANDSET MAY BE REPLACED BY ONE CONTAINING AN AMPLIFIER. THE G6AR HAND SET IS FOR CUSTOMERS WITH IMPAIRED HEARING, AND THE G7AR FOR CUSTOMERS WITH IMPAIRED SPEECH.

NOTE 5: WHEN KEYS ARE CONNECTED FOR SIGNALING, THE S LEAD OF KEY INVOLVED PROVIDES THE SIGNAL CKT AND THE G LEAD PROVIDES THE COMMON SIGNAL GROUND.

NOTE 6: ALL CONVERTIBLE KEY POSITIONS ARE ARRANGED IN THE FACTORY AS PICKUP POSITIONS. TO CONVERT A KEY FROM PICKUP (LOCKING) TO SIGNALING (NONLOCKING) REMOVE THE P-12A892 SCREW DETAIL FROM PLUNGER AT THE KEY POSITION TO BE CONVERTED. MAKE NECESSARY CONNECTION CHANGES AS SHOWN IN TABLE B. TO CONVERT A KEY POSITION FROM NONLOCKING TO LOCKING, INSERT P-12A892 SCREW DETAIL.

NOTE 7: WHEN A 565LK SET IS MULTIPLIED AT AN ADAPTER WITH SETS FURNISHING SPEAKERPHONE FEATURES, CERTAIN CONTROL LEADS IN THE SET MUST BE DISCONNECTED, INSULATED AND STORED (SEE TABLE F). THIS IS NECESSARY TO AVOID INTERFERENCE WITH WORKING CIRCUITS.

NOTE 8: LAMP NOT FURNISHED WITH SET.

NOTE 9: SET FACTORY WIRED FOR 1A1 OR 1A2. TO WIRE FOR 1A, SEE FIG. 2.

* CONNECT LEADS AS SHOWN IN TABLES C OR D.

† TERMINAL ON NETWORK

‡ LEADS ARE INDIVIDUALLY INSULATED AND STORED.
