E. New Frame Function Codes	104

1. Purpose

1.01 This Practice (BR) describes the COMMON LANGUAGE Frame Function Codes for the names (i.e., equipment designations) of frames, racks, bays, cabinets, and associated central office equipment.

COMMON LANGUAGE is a registered trademark of Bellcore.

PROPRIETARY - BELLCORE AND AUTHORIZED CLIENTS ONLY

This document contains proprietary information that shall be distributed or routed only within Bellcore and its authorized clients, except with written permission of Bellcore.

2. Scope

2.01 This BR applies to equipment having a footprint on telephone central office floor plan drawings. Organizations with the following responsibilities are affected:

- a. Planning Construction Budgets
- b. Planning Construction Schedules
- c. Engineering
- d. Installation
- e. Maintenance
- f. Investment Tracking.

3. Reason for Issue

3.01 This issue of the BR revises and replaces BR 751-410-501, Issue 6, February 1992, in its entirety. It includes additions to the listings of COMMON LANGUAGE Frame Function Codes as shown in Table E.

4. General

4.01 The frame function code and the CLEI™ basic code (character positions 1-4) will be the same except for the special conditions noted in paragraphs 5.03 and 5.06.

4.02 Questions/comments concerning frame function codes, and requests for additional frame function codes, should be directed to

Director, COMMON LANGUAGE Standards Development
Bellcore, Language Standards Department
444 Hoes Lane, RRC 4D-805
Piscataway, NY 08854

4.03 These codes are included as part of the COMMON LANGUAGE Frame Identification Code, BR 751-100-785. The data shown in Tables A through E are also available via the COMMON LANGUAGE On-line System (CLONES). Requests for logins/passwords should be addressed to

CLONES Administrator
Bellcore, Language Standards Department
444 Hoes Lane, RRC 4E-811
Piscataway, NJ 08854

CLEI is a trademark of Bellcore.

5. Frame Function Codes for Frames, Racks, Bays, Cabinets, and Associated Central Office Equipment

- 5.01 In some cases, frame function codes are shortened forms of the equipment designations. Frame function codes are used on Floor Plan Data sheets (FPD), Network Equipment Building System Data sheets (ND), and Floor Plan Drawings, and may be stamped on the equipment they represent. Each frame function code consists of no more than five characters. Special characters like the hyphen (-), ampersand (&), and virgule (/) are sometimes used.
- 5.02 Tables A and B are alphabetical listings of the current equipment designations (frame names) and their respective frame function codes; Table A is sorted by frame name; Table B is sorted by code. Tables C and D list obsolete frame function codes sorted by name and by code, respectively. Obsolete frame function codes should not be used. They should be replaced by new frame function codes in the next regular update of a document in which they appear. Table E is a listing of all frame function codes added since the previous issue of this BR.
- 5.03 A "Y" in the CLEI code column indicates that a frame function code is the same as the CLEI basic code, and detailed information pertaining to the item represented by the frame function code can be found in BRs 795-2xx-xxx or BRs 795-5xx-xxx. These frame function codes do not represent more detail than that which is imbedded in the CLEI basic code. Some of these frame function codes are the same as the first five characters of the CLEI code because the CLEI basic code does not offer sufficient identification.
- 5.04 A "Y" in the Control Group Designation column indicates a frame function code that may be assigned to a control group. (See paragraph 5.08.)
- 5.05 When abbreviations for equipment designations are required in text or in cabling diagram figures on drawings, the standard abbreviations listed in BR 751-410-101 and BR 751-410-102 will be used for the individual words of the equipment designation instead of the designation appearing on the product. For example, the abbreviations "AUX INC REG LK FR" would be used for an Auxiliary Incoming Register Link Frame, instead of "AIRL" that appears on the frame itself.
- 5.06 For the frames assigned to certain types of central offices, it is necessary to indicate their control group designation and group number. In some applications, the control group designation and group number are suffixed, after a hyphen, to the frame function code, (e.g., PSR-C2.) In these cases, the hyphen is used as a delimiter to separate the frame function code from the control group designation and group number. The hyphen is not part of the frame function code and is not included in Tables A through E. In other cases, (e.g., M--C), the hyphen is used as part of the code. Because of the addition of the hyphen, the control group designation, and the group number, frame function codes for these

frames are limited to a maximum of three characters. In another application, the control group designation and group number, in parentheses, precede the frame function code. The following list contains control group designations and group numbers:

Type of Office or Manufacturer	Control Group Designation	Control Group Number
1/1A ESS™	C	0 to 9
2 ESS	E	0 to 4
3 ESS or RSS	B	0 to 9
4 ESS	H	0 to 3
5ESS®	D	0 to 4
101 ESS	A	0 to 4
ETS	F	0 to 1
TSPS	R	0 to 4
AIS	V	0 to 4
Northern Telecom	N	0 to 9
General Telephone	G	0 to 9
Stromberg-Carlson or Siemens	S	0 to 9
NEC America	J	0 to 1
Ericsson	K	0 to 1

5.07 Where the manufacturer of the bay, frame, cabinet, etc., is indicated parenthetically, the names of the manufacturers are represented by the four-character COMMON LANGUAGE codes listed in BR 751-100-650, "COMMON LANGUAGE® Manufacturing Company Codes—Telephone Equipment."

5.08 Tables A through E contain the following trademarked telecommunications products:

- Billdats, Cosmic, Datakit, Lineage, Picturephone, and SLC are registered trademarks of AT&T.
- DMS is a registered trademark of Northern Telecom.
- SL-10 and SK-10 RAPID are trademarks of Northern Telecom.
- Century is a trademark of Stromberg-Carlson.

ESS is a trademark and 5ESS is a registered trademark of AT&T.
