

TELEPHONE STATION WIRE
IDENTIFICATION
CUSTOMER PARTICIPATION PRODUCTS

1. GENERAL

1.01 This section provides information on telephone station wire packaged for customer use in the Customer Convenience Product (CCP) line.

1.02 Whenever this section is reissued, the reason(s) for reissue will be listed in this paragraph.

1.03 This telephone station wire, in 50-foot continuous lengths, is packaged in blister-type packages and is available to the customer at Bell retail

outlets such as PhoneCenter Stores, Bell Customer Service Centers, or Bell Phone Booths.

2. IDENTIFICATION

2.01 The telephone station wire consists of four solid 22-gauge copper conductors, each insulated and color coded, red (R), green (G), black (BK), and yellow (Y). The four conductors are contained in an ivory-colored plastic jacket. This wire is identical to the D-type station wire used by telephone company craftpersons.
