

## TELEPHONE SETS 402-, 410-, AND 411-TYPE DESCRIPTION, USE, AND CONNECTIONS

### 1. GENERAL

1.01 This section covers the description, use, and connections of the 402-, 410-, and 411-type telephone sets for key equipments and station wiring plans.

1.02 This section is reissued to convert it to letter size and to incorporate material from the addendum in its proper location. In the process of this conversion, marginal arrows have been omitted.

1.03 These sets are also used for key telephone systems, therefore, pertinent wiring changes for system use are contained in the schematic drawings and tables associated with key telephone systems.

### 2. DESCRIPTION AND USE

2.01 The 402-Type Telephone Sets are of the combined desk type and are equipped with an exclusion key. This consists of a switch operated by pulling up the right-hand plunger after the hand set is removed. While the switch is operated, its contacts serve to exclude one or more extension stations. When the handset is replaced on its mounting, the switch is automatically restored to normal.

2.02 The principal components of the 402-type sets are the B1A1 ringer, the 195A condenser, the F1A or F1G handset, the 101A induction coil, the 5HB or 6A dial or the 82A-3 apparatus blank for manual service.

2.03 The 410- and 411-Type Telephone Sets are of the combined set type and are, as shown in Fig. 1, equipped with a combined turn and push button key located in the telephone set housing just below and to the left of the dial. The key has a line engraved in its top to indicate the position of the key. The key is furnished with two sets of transfer contacts operated by turning the button and a set of make contacts operated by pushing it downward. Station number card masks (described in Section C37.321) which are arranged to fit over the regular number cards are available to indicate the various turn button functions of the key. The 411-type telephone sets in addition to the combination turn and push button are equipped with an exclusion key which operates in the same manner as the exclusion key of the 402-type sets.

Fig. 1

2.04 The principal components of the 410- and 411-type sets are the B1A ringer, the 195B condenser, the F1A or F1G handset, the 101A induction coil, the 5HB or 6A dial or the 82A-3 apparatus blank for manual service.

2.05 Table 1 shows the features provided and the corresponding codes of the 410- and 411-type telephone sets and cords.

TABLE 1  
Feature Combinations Provided and Corresponding Code  
of Telephone Sets and Cords  
Combined Turn and Push Button Sets

TELEPHONE SET CODES			FEATURES							
MANUAL (See Note 1)	DIAL	MOUNTING CORD	Number of Lines Picked Up	Signalling Circuit	Line Ringer (See Note 2)	Common Ringer	Exclusion	Cut Off by Key		
								Ringer in Set *	Extension Station, External Ringer or Headset Control	Extension Station Ringer Transfer
410AA	410AC	D4AH	1	✓	✓			✓		
			1		✓					✓
			1		✓				✓	
			2		✓					
411AA	411AC	D6P	1	✓	✓		✓	✓		
			1		✓		✓		✓	
			1		✓		✓			✓
			2		✓		✓			
410BA	410BC	D6P	1	✓	✓				✓	
			1	✓	✓					
			2	✓	✓					
			2			✓				
411BA	411BC	D8M	1	✓	✓		✓			✓
			1	✓	✓		✓		✓	
			2	✓	✓		✓			
			2			✓	✓			
410CA	410CC	D8M	2	✓		✓	✓			
411CA	411CC	D10C	2	✓		✓	✓			

Note 1- Dial is replaced with apparatus blank.

Note 2- The connections provide for ringing on line 1. If ringing on line 2 is required, connect the red ringer lead and the yellow condenser lead to terminals 3 and 4 respectively.

Note 3: When the suffix R is shown added to the code number of any telephone set shown in Table 1, it indicates that the telephone set is equipped with a retractile handset cord. For example: a 440AA-3 key telephone set equipped with a retractile handset cord becomes a 440AAR-3 key telephone set. Sets ordered with the suffix R will be equipped with retractile handset cords when received.

\* When only feature desired is to silence ringer in set a 305 type set should be used.

### 3. CONNECTION

#### 402-Type Sets

3.01 Fig. 2 is a schematic drawing for the 402A (manual) and 402C (dial) telephone sets and Table 2 lists the features provided as well as the telephone set connections for those features.
