

K1A HANDSET IDENTIFICATION, CONNECTIONS, AND MAINTENANCE

1. GENERAL

1.01 The K1A handset is initially intended for use with the 900A, 910A, 920A, 921A, 930A, 950A, 2900A, 2910A, 2920A, 2921A, 2930A, and 2950A DESIGN LINE* telephone sets.

*Trademark

1.02 The K1A handset is a factory sealed unit.

2. IDENTIFICATION

APPLICATION

2.01 The K1A handset (Fig. 1) is of modular configuration designed for use with the applicable modular DESIGN LINE Telephone Sets.

Ordering Guide

2.02 Basic Handset:

- Set, Hand, K1A-†
- Cord, Handset, H4DU-† (ordered separately)

†Add color suffix: Black (-03), Ivory (-50), White (-58), Yellow (-93), Dark Brown (-104), Dark Green (-105), and Lime Green (-106).

Design Features

2.03 Standard handset circuit with T1 transmitter and LB-type receiver. Sealed handset is equipped with a receptacle type transmitter cup which receives the modular handset cord plug and may also be used with the 5A cord reel.

3. CONNECTIONS

3.01 Connect the K1A handset by plugging the handset cord into the handset jack and the other cord plug into the jack mounted in the telephone set base. Be sure the spring clips lock in place.

3.02 To replace the K1A handset, depress clip and pull plug of handset cord out of handset.

3.03 Refer to Fig. 2 for internal connections of the handset.

4. MAINTENANCE

4.01 The K1A handset is a sealed unit, therefore, maintenance of the handset is limited to cleaning with a water-dampened cloth.
