

## “TELEVISION”

“We helped television get born and we’ve helped it grow.

“We made television sending and receiving apparatus back in 1927 and worked it by wire between Washington and New York City and by radio between Whippany, New Jersey, and New York.

“We can transmit television over wire lines and by radio. We produced the coaxial cable, which is particularly adapted to television. We have some coaxial installed now and are install-

ing more. We are also setting up a micro-wave radio-relay circuit.

“Whatever television needs from us for transmission, we’ll be prepared. It might be a network of cables or radio beams or both.

“We explore the field in order to do our part — which is the transmission of television from place to place, just as we furnish transmission for the radio networks now.

“We’re going to keep on studying all methods — and use the best.”

**BELL TELEPHONE SYSTEM**

*Listen to “THE TELEPHONE HOUR”  
every Monday evening over NBC*
