

# Introducing The Mighty Mite of Key Systems

# The Com Key\* 416 Key Telephone System

is an advanced concept in business communications which offers you these standard features ...

Pick-up, hold, illumination including wink/hold  
Automatic Button Restoration  
Flexible Ringing  
Recall  
Decorator Faceplates  
Tone Ringing  
Volume Control ...

**PLUS ...**

**Built In Loudspeaker Service** allows you to conduct group conferences by permitting the telephone conversation to be heard by anyone in the vicinity of the telephone set. Saves repeating information to individuals ... everyone hears at the same time.

**Direct Station Selection Intercom** increases your intercommunicating capabilities ... can provide two dedicated intercom paths ... no need to wait for a free intercom line ... faster dialing ... just push a button with the person's name ... no need to remember dialing codes.

**Multi-Line Conferencing** increases your effectiveness ... saves time and money. You don't have to make repeated calls to get a job done ... you can get the people you want to talk to on the line together.

**One Way Voice Signaling On Intercom** can let you know who is calling before you pick-up the phone. The built-in loudspeaker service enables you to determine how you want to handle a call by giving your secretary the ability to make a voice announcement rather than just an intercom buzz. You know who's calling and what line they are on before you touch the telephone.

**And for your added convenience these additional features are available on an optional basis:**

Supplementary Ringing  
Automatic Dialer Capability  
Headset Capability  
Power Failure Ringing  
Privacy/Privacy Release  
Station Restriction  
Supplementary Power  
Tone-on-Hold  
Touch-Tone® Calling  
Paging Loudspeakers  
Preset Intercom Voice Signaling  
Personal Lines

**and more ...**

**With A Busy Lamp Field** you know whether people are on their telephones before you try to place a call ... a convenient time and money saver.

**The Hands Free Answer On Intercom (HFAI) Station** allows you to answer an intercom call without depressing buttons or picking up the handset. Just speak into the microphone built into the telephone set and the calling party will hear you.

**With Music On Hold** callers on hold calls will be connected to a music or program source of your choosing. It lets them know they haven't been forgotten or disconnected.

**With Paging Access** you have an easy and convenient way to summon personnel in virtually every part of the office or plant via the system's paging loudspeakers.

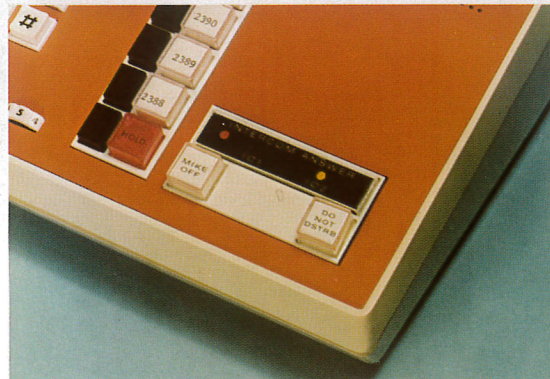

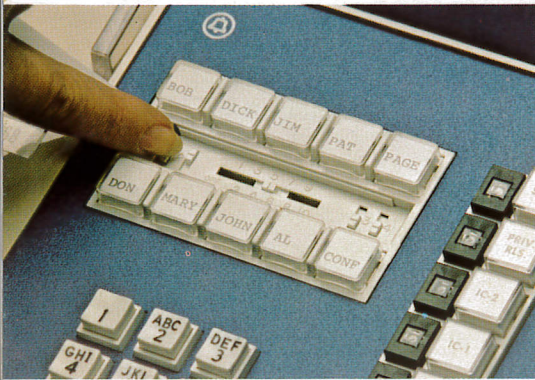

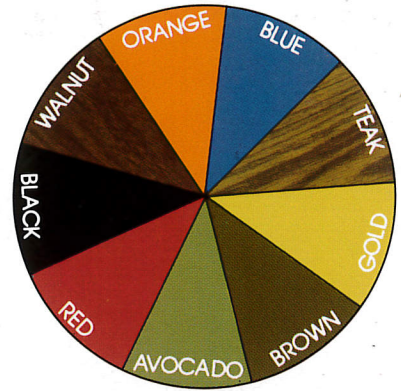

**The Built-In Speakerphone** service will add a new dimension to your business communications ... you can talk on central office and intercom lines totally hands-free ... allowing you to perform other tasks.

Available Faceplate Colors

## Let Mighty Mite give you the edge

with up to four common  
lines and sixteen tele-  
phones together with  
features that rival the big  
guys.
