

Bell System
**TELE-LECTURE
CONFERENCE SET**

a powerful
amplifier-speaker system
designed for
group participation
via the regular
telephone network

Bell System

TELE-LECTURE CONFERENCE SET

**amplifies one or both sides of any local,
long distance or overseas telephone call
so groups of people may hear and participate**

AS A CONFERENCE AID

- ☐ Your top personnel or distinguished speakers may actively participate in your conferences and meetings even though they cannot attend in person.
- May be used for banquets, lectures, conventions and all similar gatherings — flexible, versatile, effective.

AS A TRAINING AID

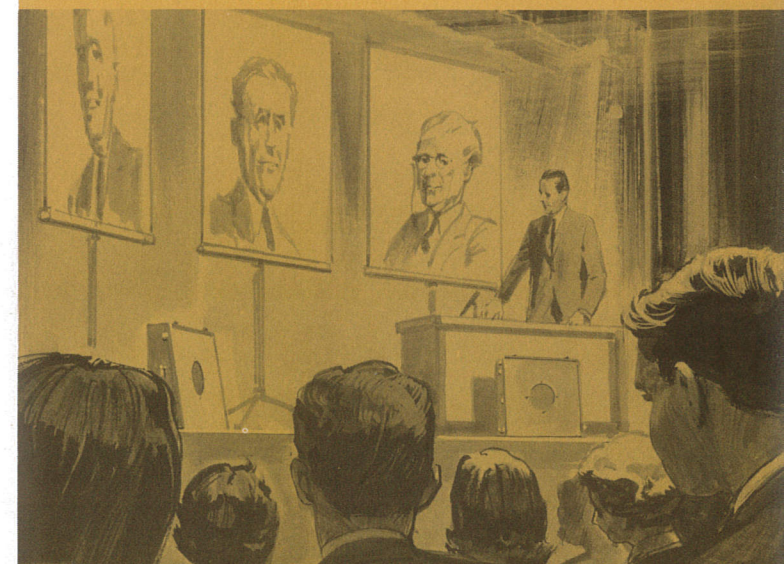

- ☐ Your best-qualified training directors can lecture by phone, wherever their help can best be used.
- Makes it possible for training personnel to reach much larger audiences than by personal contact.
- Makes special instructional resources economically available to all — so trainees learn faster.
- Participants become involved both by listening and by actively participating in telephone conversations.

OTHER "PLUS" BENEFITS

- ☐ Speaker may be heard from his office or home, wherever a telephone is handy — no special equipment required at his end.
- ☐ Additional loudspeakers are available for special arrangements.
- ☐ Several conference sets may be used at the same time in different locations and in different cities.
- ☐ Both sides of a conversation may be amplified when you wish.
- ☐ You can place calls privately and talk with lecturer without being overheard whenever you wish.
- ☐ Lightweight portable microphones permit participation throughout your conference setting.
- ☐ Headset permits private conversations — especially desirable for establishing calls and for pre-conference planning.
- ☐ Easy to use.
- ☐ Can be set up wherever a telephone jack and electrical power are available.
- ☐ No capital investment — nothing to buy.
- ☐ Rugged, dependable Bell System equipment.
- ☐ Prompt, reliable maintenance at no extra cost.

ONE SPEAKER CAN TALK TO SEVERAL AUDIENCES at once, and these audiences may be located anywhere. This extends the reach of important speakers most economically.

SEVERAL SPEAKERS IN VARIOUS LOCATIONS ANY DISTANCE APART may participate in panel discussions by Tele-Lecture. Audiences hear and participate in question-and-answer sessions.

ROVING MICROPHONES permit members of your audience to talk directly with the Tele-Lecturer. This lets the speaker answer questions and key his presentation to the interests and responses of your audience.
