handy for stationary
"drop light" usage.

• 32 inch heavy
rubber covered,
non-kinking cable.

• Unbreakable plastic
head gives excellent,
diffused, "area" lighting.
Aluminum reflector.

NO BATTERIES INCLUDED
Uses standard 2-cell

IT'S UNBREAKABLE!

Made of ethyl cellulose—case won't crack, dent or corrode. Tested to withstand external pressure of 30,125 lbs.

IT'S WATERPROOF!

Will even operate under water! Won't rust or corrode. All working parts solid brass.

IT'S NON-CONDUCTIVE!

Shockproof, safe! A prime necessity for persons engaged in electrical work, and around the car and home.

No. 126—The complete unit includes the GITS unbreakable plastic flashlight and extension light attachment. Practical black color. "Right angle," stand-up style. Heavy duty specifications and construction throughout. Flashlight reflector throws long range "spot" beam, is silver-plated and polished. 3-way metal switch—tested by over a million "off-on" operations. Sturdy metal belt clip. Spare bulb in base. (Uses standard 2-4 volt prefocused.)

No. 126-A—GITS "right angle" style flashlight as above—but without extension attachment.

No. 126-2 EXTENSION UNIT ONLY—Pre-assembled cord, with plug, clamp and flashlight head, as illustrated.
