

INTRODUCING A NEW CONCEPT  
IN BUSINESS COMMUNICATIONS

**STROMBERG-CARLSON® 6K-1 SYSTEM**  
WITH THE NEW 1700 TELEPHONES

**NEWEST, SMARTEST,  
MOST VERSATILE  
KEY TELEPHONE  
SYSTEMS**

Modern offices need the unique services provided by the Stromberg-Carlson 6K-1 system and the ultra-modern 1700 series telephones.

The 1706 instrument is ideal where up to 5 C.O. lines are required; the 1712 instrument is recommended where up to 11 C.O. lines are needed. If the initial need is for 5 lines, with future expansion indicated, the 1712 telephone is installed. Then, when desired, simple additions put the second set of C.O. lines into service.

The turret-design 1700 series telephones are engineered with traditional Stromberg-Carlson high fidelity performance. They provide unmatched flexibility, coupled with the most-wanted service features . . . including push-button control! The trim lines of these new telephones say *functional beauty*; their operating features say *communications efficiency*; the Stromberg-Carlson name bespeaks *quality*.

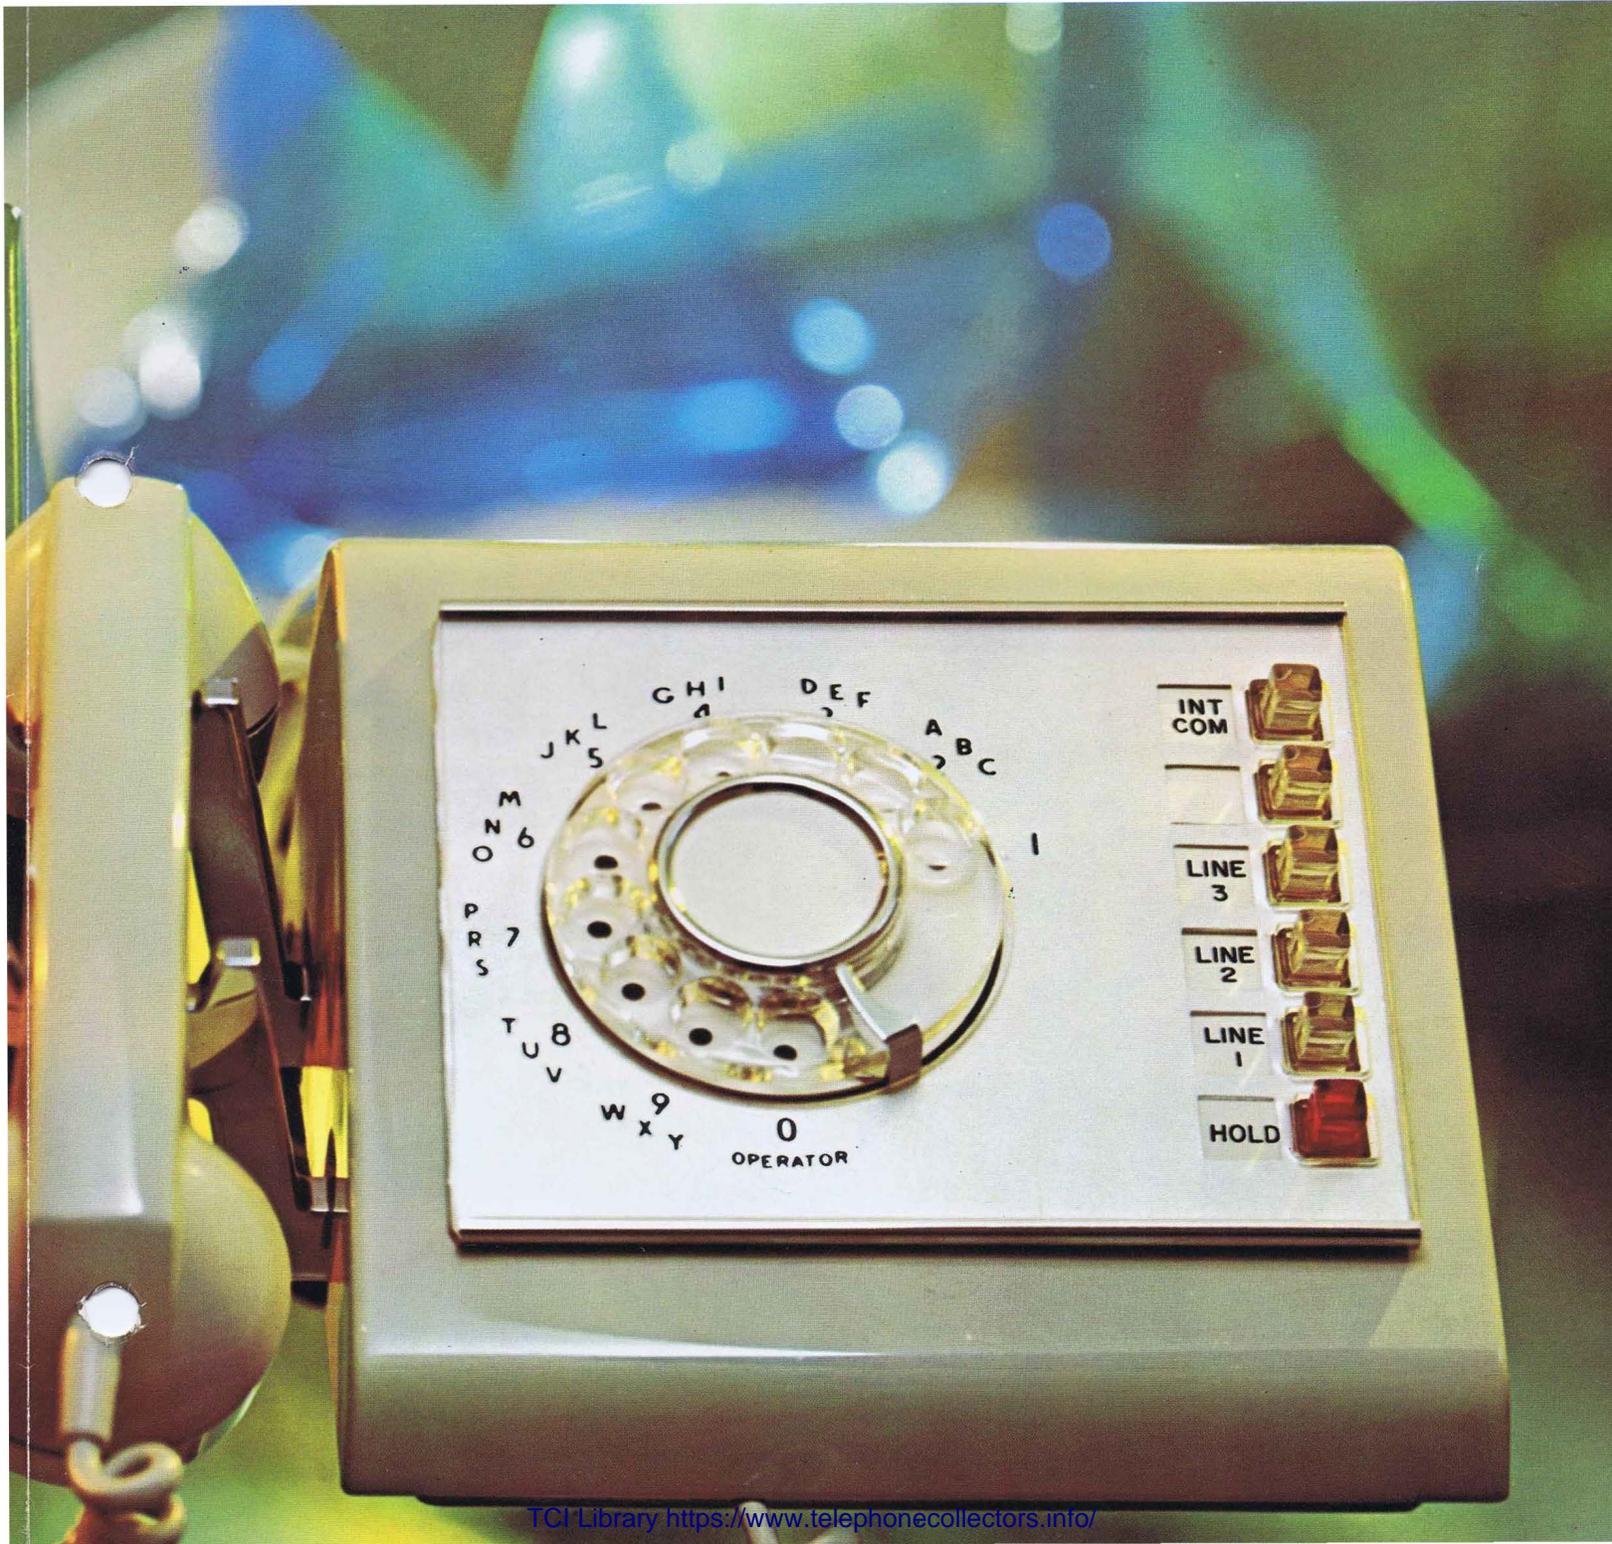

The phones are available in beige, gray or green.

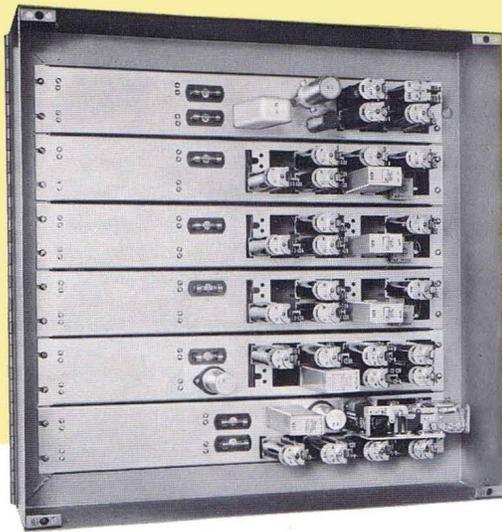

## THE NEW, ULTRA-MODERN 1700 SERIES TELEPHONES

■ may be used interchangeably with 1575 instruments in any existing Stromberg-Carlson 6K-1 PBX System.

■ are completely compatible with other manufacturers' similar fixed-capacity key systems.

## THE 6K-1 RELAY CABINET

... with removable front cover, measures only 21" square and 7" deep. The stock cabinet provides for three C.O. line circuits, **factory-wired and equipped!** Basic wiring is included for additional lines, intercom signaling, tie-lines or other options to fit the needs of the installation. This exclusive packaging method makes Stromberg-Carlson 6K-1 equipment **the easiest wiring-plan system to install.**

## THE STROMBERG-CARLSON® 6K-1 SYSTEM WITH NEW 1700 SERIES TELEPHONES

TECHNICALLY SPEAKING . . . this performance- and feature-packed key system puts a miniature switchboard right on the user's desk!

- The basic 6K-1 system permits making and receiving outside calls, holding, signaling and transfer. Push-buttons on the 1700 series instruments light up; incoming calls are indicated by rapid flash; held lines by slow flash; busy lines by steady lamp signal.
- Manual intercom is a standard feature. Available options include dial intercom—for faster placing of internal calls; manual exclusion which allows selected personnel to converse in complete privacy; automatic tie-lines which permit linking of systems in different areas.
- The 1706 phone features 5 line or special-use push-buttons, plus a sixth button for holding calls and for intercom.
- The 1712 phone provides 11 line or special-use push-buttons, and a button for holding and for intercom.
- The 1700 series telephones are arranged for gong-ringer, buzzer, or tone-ringer as desired.
- The telephones can be used interchangeably with conventionally-styled Stromberg-Carlson 1575 key phones. They are completely compatible with existing 6K-1 systems —and with other manufacturers' similar fixed-capacity systems.

STROMBERG-CARLSON 1706  
Turret Dimensions: 7½" wide, 7⅞" deep, 4⅛" high. Beige, gray or green.

STROMBERG-CARLSON 1712
