

Bell System
**BUSINESS
INTERPHONE**
Communications System

a complete
intercommunications
system featuring
automatic
"hands-free" answering

Bell System

BUSINESS INTERPHONE

COMMUNICATIONS SYSTEM

this versatile intercom service permits
you to answer and talk "hands-free"
...and is built into your telephone system

EFFICIENT

- ☐ Reach any other intercom station merely by lifting handset and dialing one or two digits or pushing a button.
- Talk with associates without leaving your desk — cuts “walk-to-talk” delays.
- Automatic, even after hours — no need for switchboard attendant.
- ☐ Receive intercom calls, hear and be heard, without lifting your telephone handset.
- Frees you to take notes, refer to records and move around while you listen and talk.
- Cuts delays, boosts productivity.
- Lift handset to disconnect the Business Interphone unit when privacy is desired.

FLEXIBLE

- ☐ Any or all phones may be a part of your intercom system.
- Phones on the system may or may not be equipped with Business Interphone units, according to your needs.
- Business Interphone units may be desk- or wall-mounted.
- ☐ Transistorized, plug-in equipment permits custom design.
- Up to 18 intercom calling codes with as many as six phones on each code.
- And up to three preset conference codes with as many as six stations each.
- As many Business Interphone systems as you need can be built into your over-all telephone service.

ECONOMICAL

- ☐ Your entire “inside” communications needs can be met in one low-cost package.
- Purchase no equipment, make no capital investment.
- Receive prompt, reliable maintenance on dependable Bell System equipment at no extra cost.

SPECIAL BENEFITS

☐ CONFERENCE FEATURE

- Confer with as many as six others merely by dialing a code or pushing a button.
- Lets caller hear and be heard by each of the called stations.
- Called stations confer “hands-free” with the caller.
- Privacy and full two-way conference among all stations can be achieved when handsets are used.
- Any station may be part of any or all conference codes.

☐ DIRECT STATION SELECTION

- Lets you call an intercom station by pushing a button, without dialing.
- Permits calling several stations at once, if desired.

☐ “ADD-ON” FEATURE

- Connects an intercom station to an “outside” call.
- Reduces need for “call-backs.”
- Minimizes possibility of error — improves customer service.

☐ VISUAL AND AUDIBLE SIGNALS

- Line-ready tone tells you line is available.
- Distinctive incoming call tone announces incoming call.
- Flashing light indicates incoming call for you.
- Steady light at other stations indicates busy line.

- ☐ DECORATOR COLORS to match your telephones.

Bell System
**BUSINESS
INTERPHONE**
COMMUNICATIONS SYSTEM
